Encl: (1) Program Action and Responsibilities  
(2) Physical Fitness Assessment (PFA)  
(3) Medical Screening and Waivers  
(4) Conditioning and Test Safety  
(5) Fitness Enhancement and Weight Management Programs  
(6) Body Composition Assessment (BCA)  
(7) Physical Readiness Test (PRT)  
(8) Administrative Actions  
(9) Command Fitness Leader (CFL) Qualifications  
(10) Navy Physical Fitness Assessment (PFA) Checklist  
(11) Inspection Checklist

1. Purpose To provide policy and procedures for Navy's Physical Readiness Program as directed by reference (a). This instruction is a major revision and should be reviewed in its entirety.

2. Cancellation. OPNAVINST 6110.1F.

3. Applicability. Provisions of this instruction apply to all active and reserve naval personnel, enlisted and officers, E-1 through O-10. The term commanding officer in this instruction refers equally to commanders, commanding officers, and officers in charge.

4. Policy

a. Physical fitness is a crucial element of mission performance and must be a part of every Navy member's life. Mission readiness and operational effectiveness are built on the physical fitness of the individual; therefore, all Navy personnel shall maintain personal physical fitness by regular exercise and proper nutrition.

b. The principal goal of the Physical Readiness Program is to create a culture of fitness to enhance a member's ability to complete tasks that support the command's mission. COs shall aggressively integrate physical readiness activities into the workweek in the same manner applied to meeting other mission and operational requirements.

c. Commands must develop and implement a Fitness Enhancement Program (FEP) that meets the needs of all personnel striving for improved fitness, not simply those who do not meet standards. FEP must be designed to increase and maintain cardiorespiratory fitness; muscular strength and endurance; flexibility; reduce excess body fat; promote year-round fitness and health; and provide nutritional guidance. Activities shall ensure all medically qualified personnel meet or surpass all physical readiness standards. Testing the physical fitness and readiness of every uniformed member of Navy is required.

d. Physical Fitness Assessment (PFA) includes Body Composition Assessment (BCA) and Physical Readiness Test (PRT). BCA is the maximum weight for height screening and body fat percentage estimation based on circumference measurements. The PRT is the sit-reach, curl-ups, push-ups, and either run or swim. All Navy personnel, regardless of age, shall participate in semi-annual PFAs unless medically prohibited.

e. All personnel are required to meet standards set forth in this instruction. Members who are unable to meet PFA standards or mission-related physical fitness standards required of units can be subject to administrative action. COs shall recognize members who make significant improvements in physical fitness or consistently score excellent or better, through comments on NAVPERS 1610/2, Fitness Report and Counseling Record (E7-O6) (FITREP), NAVPERS 1611/2, Report on the Fitness of Flag Officers and Flag Selectees (FLAG FITREP), and NAVPERS 1616/26, Enlisted Evaluation and Counseling Record (E1-E6) (EVAL), as well as other incentive awards.

## 5. Action

a. COs, are responsible for physical fitness of personnel and shall establish and maintain an effective year-round Physical Readiness Program consistent with this instruction and unit mission. Enclosure (11) is provided for use in self assessment evaluations.

b. All personnel shall participate in a year-round physical fitness program to meet physical readiness standards consistent with this instruction and unit mission. Personnel who cannot participate in such a program due to a valid medical condition shall be placed in a rehabilitative program, designed by a Command Fitness Leader (CFL) and Navy Morale, Welfare, and Recreation (MWR) fitness instructor, in conjunction with appropriate medical personnel.

## 6. Forms

a. NAVPERS 1070/613 (Rev 10-81), Administrative Remarks, NAVPERS, 1610/2 (7-95), Fitness Report and Counseling Record (E7-O6), NAVPERS 1616/26 (7-95), Enlisted Evaluation and Counseling Record (E1-E6) are available in the Naval Inventory Control Point using requisitioning procedures contained in CD-ROM NAVSUP PUB 600(NLL), Navy Stock List of Publications and Forms and also online at <http://forms.daps.mil/order/>.

b. NAVPERS 1611/2 (7-95), Report on the Fitness of Flag Officers and Flag Selectees is available online at <http://www.bupers.navy.mil/pers00f/index.html>.

c. SF-600 (Rev. 6-97), Chronological Record of Medical Care is available online at <http://www.gsa.gov>.

d. NAVMED 6120/3 (Rev. 6-91), Annual Certificate of Physical Condition is available in the Naval Inventory Control Point using requisitioning procedures contained in CD-ROM NAVSUP PUB 600(NLL), Navy Stock List of Publications and Forms. Form may also be obtained online at website <http://forms.daps.mil/order/>.

7. Report. Reference (a) requires Navy to report on Physical Readiness Program annually. All commands will report results of two PFAs per person per calendar year via Physical Readiness Information Management System (PRIMS) at website [www.mwr.navy.mil/mwrprgms/missup.htm](http://www.mwr.navy.mil/mwrprgms/missup.htm). NAVPERSCOM (PERS-651) will submit an annual report to Department of Defense (DOD). PRIMS reporting requirement is exempt from reports control per SECNAVINST 5214.2B.

GERALD L. HOEWING  
Vice Admiral, U.S. Navy  
Deputy Chief of Naval Operations  
(Manpower and Personnel)

Distribution:  
SNDL Parts 1 and 2

10 October 2002

**PROGRAM ACTION AND RESPONSIBILITIES**

1. Deputy Chief of Naval Operations (CNO) (N1) shall establish Physical Readiness Program policy and support the program by the following actions:

- a. Provide educational support to commands for all health promotion program elements as they impact physical readiness.
- b. Provide information and establish training for CFLs.
- c. Provide technical assistance to develop, implement, and evaluate program activities at each command.
- d. Provide guidance for weight management programs.
- e. Provide guidance for administrative actions concerning enlisted personnel and officers.
- f. Provide ongoing program evaluation.

2. Chief of Naval Personnel (CHNAVPERS) shall:

- a. Provide policy guidance for Navy's Health Promotion Program.
- b. Establish PFA standards and FEP guidance.
- c. Promote development and use of incentive awards to encourage maximum levels of fitness and health in individuals and commands.
- d. Provide policy guidance on Navy's Physical Readiness and Nutrition Programs.
- e. Maintain statistical data on physical fitness performance of members throughout their career and develop reporting systems as appropriate.
- f. Develop and maintain an appropriate Navy database to monitor PFA performance of all personnel by age, gender, ethnicity, and other appropriate factors.

3. Commander, Naval Safety Center (COMNAVSAFECEN) shall evaluate/analyze data on Physical Readiness Program injuries and deaths.

4. Chief, Bureau of Medicine and Surgery (CHBUMED) shall:

a. Develop procedures and policy to ensure servicemembers who have body composition/physical fitness challenges are properly screened and referred for evaluation, as necessary.

b. Develop procedures and policy to ensure that medical department personnel execute their responsibilities regarding the Physical Readiness Program in an appropriate and consistent manner throughout Navy.

c. Provide technical assistance with implementation and evaluation of Physical Readiness Program.

d. Conduct research in appropriate physical readiness areas to ensure physical readiness testing adequately evaluates physical readiness needs of Navy.

5. Commander, Naval Supply Systems Command (COMNAVSUPSYSCOM) shall provide technical assistance to local commands by providing materials and information to educate commands and food service personnel on basic nutrition, low fat menu planning and promotion activities, food preparation, and procurement procedures in support of the nutritional standards.

6. Chief of Naval Education and Training (CNET) shall:

a. Provide General Military Training (GMT) curricula on Physical Readiness Program.

b. Include Physical Readiness Program curricula at basic accession points, such as Officer Candidate School (OCS), Officer Indoctrination School (OIS), Naval Reserve Officer Training Corps (NROTC), Recruit Training Command (RTC), etc.

7. Commander, Navy Recruiting Command (COMNAVCRUITCOM) shall ensure all men and women recruited into Navy meet minimum entry-level physical readiness standards and are aware of requirement to comply with physical readiness standards contained in this instruction.

8. Commanding Officer, Recruit Training Command (RTC) shall ensure all members meet or exceed physical readiness standards upon completion of recruit training.
9. Commander, Naval Reserve Force (COMNAVRESFOR) shall:
  - a. Implement a program compatible with existing directives and Reserve training time outlined in reference (b).
  - b. Ensure all Drilling Reservists, including Voluntary Training Unit (VTU) members, complete PFA twice annually.
  - c. Ensure reserve unit Commanders, COs, and OICs and reserve healthcare professionals assist, advise, and educate commands in implementing Physical Readiness Program.
  - d. Ensure compliance with all reporting requirements outlined in enclosure (8).
  - e. Establish policy for Drilling Reservists pertaining to timing of PFAs and conducting FEPs.
10. Immediate Superiors in Command (ISICs) shall develop awards that promote and recognize physical readiness of subordinate commands and individuals within commands. Awards shall recognize achievement and maintenance of superior fitness, overall readiness, command fitness program quality, and other actions that advance Navy physical readiness.
11. Commanding Officers shall:
  - a. Aggressively integrate physical readiness activities into workweek while meeting mission and operational requirements. Physical readiness activities shall include a minimum of three sessions devoted to moderate and moderately high intensity physical conditioning. Physical conditioning sessions should be at least 40 minutes in length to allow for proper warm-up and cool-down, and consist of at least 20-30 minutes of continuous aerobic activity.
  - b. Ensure galleys and messes follow healthy menu standards and develop healthy cycle menus. COMNAVSUPSYSCOM's 35-day Healthy Cycle menu shall be incorporated if no local healthy menu exists. Menus are available on NAVSUP homepage

10 October 2002

(<http://navsup.navy.mil>). Ensure nutrition information is available: at a minimum, calories and fat grams will be posted for all entrees, including speedline items. NAVSUP Pub 486, appendix J, Food Service Management for General Messes, provides nutrient analysis information and is available from NAVSUP website <http://www.navsup.navy.mil>.

c. Ensure command training emphasizes healthy food choices, exercise, and lifestyle change.

d. Appoint in writing a CFL to carry out this instruction. Ensure CFL meets qualifications and training requirements.

e. Appoint in writing assistant CFLs (as necessary) to carry out this instruction. An optimal number is one assistant per 25 members, depending on command size and structure.

f. Administer an effective FEP addressing individual needs of all members. Use available installation and local facilities, programs, and staff to intervene and ensure member meets physical readiness standards consistent with this instruction and unit mission.

g. Ensure command has sufficient members certified and current in cardiopulmonary resuscitation (CPR) (from American Red Cross or American Heart Association) to safely conduct and monitor Physical Readiness Program activities.

h. Upon transfer of an enlisted member, ensure a copy of completed NAVPERS 1070/613, Administrative Remarks page per reference (c), article 6110-010 and other documents are forwarded to member's next command. Retain copies for 4 years.

i. Upon transfer of an officer, ensure a copy of written counseling for PFA failure(s) and other documents are forwarded to member's next command. Retain copies for 4 years.

j. Enter PFA results in NAVPERS 1610/2, NAVPERS 1611/2 or NAVPERS 1616/26 per reference (d).

k. Forward result of PFA for command members (using Navy Personnel Command (NAVPERSCOM)-approved Physical Readiness Information Management System (PRIMS)) to NAVPERSCOM (PERS-651) within 30 days of completion of PRT.

l. Ensure two PFAs each calendar year are announced and conducted for medically qualified members.

m. Ensure proper safety precautions are followed during PFAs and FEP, as outlined in enclosure (4).

n. Ensure members receives proper medical screening prior to participation in PFA and FEP.

o. Ensure members with nutritional or performance challenges are referred to CFL for placement into nutritional and conditioning programs. Refer members to medical upon their initial failure to meet body composition assessment standard.

p. Issue a NAVPERS 1070/613, Administrative Remarks, each time an enlisted member fails to meet body composition assessment and or PRT standard, forward to NAVPERSCOM (PERS-31) original for inclusion in permanent personnel record, and file a copy in field service record.

q. Issue written counseling each time an officer fails to meet body composition assessment and or PRT standard. Forward a copy to NAVPERSCOM (PERS-834) for monitoring if it is third or subsequent failure in 4 years or there is cause to believe that officer is physically unqualified for promotion as a result of failure to meet the Physical Readiness Program standard.

r. When feasible and appropriate, afford members an opportunity to attend ShipShape (BUMED-approved Weight Management Program) (enclosure (5)).

s. Appropriately recognize members who achieve and maintain outstanding fitness. Additionally, members who have made improvement in physical readiness should be recognized by comments on NAVPERS 1610/2, NAVPERS 1611/2, and NAVPERS 1616/26.

t. Distribute health and fitness materials in support of NAVPERSCOM health promotion initiatives.

12. CFL shall:

a. Become thoroughly familiar with components of this instruction and advise the chain of command on all Physical Readiness Program matters.

- b. Obtain and maintain current CPR certification.
- c. Complete NAVPERSCOM-approved CFL training course as soon as possible upon assignment as CFL.
- d. Schedule and announce PFA (enclosure (2)). Facility requirements should be coordinated with the appropriate base, county, or city recreation services and requested in advance to minimize effect on recreation programs.
- e. Follow all testing and measuring requirements, and safety precautions (enclosure (4)), in conjunction with command safety officer, MWR, and medical department.
- f. Instruct assistant CFLs to conduct PRT, body composition assessment, and FEP. Obtain CPR training for members who help monitor PRT and FEP.
- g. Report any injuries related to Physical Readiness Program to command safety officer.
- h. Obtain and maintain updated physical readiness resources for use by command personnel.
- i. Closely monitor members who have completed ShipShape and provide assistance in weight management follow-up activities.
- j. Confer with COs at least quarterly to discuss current and impending referrals for ShipShape, progress of personnel in FEP and weight management follow-up activities, and other items of mutual concern.
- k. Ensure each member brings completed Physical Activity Risk Factor Screening Questionnaire (PARFQ) to Preventive Health Assessment (PHA) appointment.
- l. Provide commanding officer with results of each PFA.
- m. Notify command, including command master chief (CMC) and command career counselor (CCC), of member's PFA result and required administrative actions, particularly regarding reenlistment eligibility.

13. MWR department shall:

- a. Ensure facilities and fitness staff members are available to assist with PFA, physical training, and command-organized or member-organized programs.
- b. Provide assistance and support to local CFL, to the fullest extent possible, within existing and authorized resources.
- c. Ensure fitness staff support and endorse nutritional and exercise principles described in enclosure (5).
- d. Ensure that healthy, low-fat food choices are available at Navy clubs.
- e. Conduct assistance visits at units and tenant commands to provide recommendations for improvement of command Physical Readiness Programs.

14. Navy MWR Fitness Instructor shall:

- a. Obtain and maintain fitness instructor certification from a national organization, e.g., American College of Sports Medicine, Cooper Institute for Aerobics Research, or National Strength and Conditioning Association, as a condition of employment.
- b. Obtain community first aid and CPR certifications as required by DOD and Navy standards and policies.
- c. Personally oversee exercise prescriptions on a regular basis for personnel who fail to attain satisfactory standards on PFA.
- d. Upon request, provide Commanders, COs, and OICs with guidance on developing FEP for members.
- e. Develop physical conditioning programs and counsel individuals who are medically waived from all or part of PFA.
- f. Ensure availability and appropriateness of fitness improvement programs and facilities, and provide required education and training.

g. Provide guidance for local policy for environmental acclimatization to participate in physical conditioning and activities.

h. Provide annual fitness status updates and educational presentations for installation senior leaders and command personnel regarding Physical Readiness Program.

15. Individual servicemembers shall:

a. Maintain a lifestyle that promotes optimal health and physical readiness. Develop a regular, year-round, fitness program of aerobic, flexibility, and muscular strength and endurance exercises. A fitness program shall include aerobic physical exercise sessions at least three times per week consisting of at least 40 minutes of activity, including a minimum of 20 to 30 minutes of brisk aerobic exercise, a strength and flexibility component, and warm-up and cool-down periods. In addition, daily tasks should be pursued that result in the accumulation of 30 minutes of moderately intense physical activity and minimization of sedentary periods.

b. Answer PARFQ completely and truthfully.

c. Report for PRT and physical training with a level of fitness that ensures safe participation.

d. Report injuries or illnesses that prevent participation in PRT, FEP, or individual physical activities.

e. Participate in PFA and FEP unless absence is authorized by COs.

f. Maintain prudent diet as outlined in enclosure (5).

10 October 2002

## **PHYSICAL FITNESS ASSESSMENT (PFA)**

1. PFA. The PFA (BCA and PRT) is part of a total health, physical fitness, and readiness program. Categories and levels for physical fitness and body fat percentage identify standards against which a member may assess physical readiness strengths and weaknesses. Goals based on standards promote development of an individualized fitness program that fosters improvement beyond what is minimally acceptable. The "Probationary" standard represents the minimum acceptable performance standard. All naval personnel shall strive to optimize fitness and readiness by exceeding minimum standards and achieving continual improvement.

### 2. Purpose of PFA

a. Provide members with goals to promote basic physical fitness, health, and readiness.

b. Provide commanding officers a means of assessing the general fitness of command members.

### 3. PFA Components

a. BCA. Body composition is assessed by

(1) An initial weight and height screening.

(2) A Navy-approved circumference technique to estimate body fat percentage.

b. PRT. PRT is a series of physical activities designed to evaluate factors that enable members to perform physically. Factors evaluated are

(1) Flexibility via sit-reach.

(2) Muscular strength and endurance via

(a) Curl-up.

(b) Push-up.

(3) Aerobic capacity via

- (a) 1.5-mile run/walk, or
- (b) 500-yard or 450-meter swim.

4. Scheduling of PFA

a. Approximately 15 weeks before date of PRT

(1) Establish dates for PFA components.

(a) Dates for PFA components shall be selected in consultation with commanding officers.

(b) Dates shall result in completion of member's PFA at least 4, but not to exceed 8 months since member's last PRT.

(c) Select alternate dates for members who cannot participate in components due to poor weather, Temporary Additional Duty (TAD), leave, holidays, etc.

(d) Reserve swimming pool (if necessary).

(2) Select and train assistants in

(a) Physical Readiness Program data completion.

(b) Proper body composition assessment techniques.

(c) Proper warm-up, cool-down, and exercise event procedures.

(d) Administrative procedures.

b. No less than 10 weeks prior to scheduled date of PRT

(1) Release official directive to command announcing official test dates.

(2) Verify member's Preventive Health Assessment (PHA) was completed within past year. If not, refer to medical department.

(3) Conduct preliminary (courtesy) BCA. Results shall not be used to establish whether or not members meet BCA

standards for the administrative actions required by this instruction. If members fail to meet BCA standards and no documentation exists of prior medical evaluation for exceeding BCA standard, members shall be referred to the medical department.

(4) Verify member's periodic physical examination is current. If not, refer to medical department.

(5) Schedule CPR certification for PRT monitors and assistant CFLs.

(6) Develop PRT safety plan (enclosure (4)).

(7) Confirm arrangements and suitability of site, CPR support, lifeguards, equipment availability, etc. Coordinate with MWR or other recreational services, if necessary.

c. Eight weeks prior to scheduled date of BCA and PRT ensure members have confirmed medical department appointment for evaluation for those who:

(1) Do not have a current PHA or periodic physical examination or,

(2) Have exceeded BCA standard (for the first time in career) during courtesy BCA.

d. Normally within 10 days of, but absolutely not less than 24 hours prior to member's participation in PRT (Drilling Reservists comply with reference (b)):

(1) conduct BCA.

(2) Ensure members who did not have current PHA or current periodic physical examination have been or are being evaluated by medical department.

(3) Enter BCA measurements into PRIMs.

(4) Provide Navy Weight Control Self-Study Guide (reference (e)) to any member who fails to meet body composition standards. This self-study guide is available online at website [www.mwr.navy.mil/mwrprgms/missup.htm](http://www.mwr.navy.mil/mwrprgms/missup.htm) or <http://n11.navsup.navy.mil>.

e. Day prior to conducting PRT

(1) Consult with the commanding officer regarding cancellation criteria and procedures.

(2) Review safety plan and other procedures with assistant CFLs.

(3) Confirm site, equipment, safety, and test personnel, etc. are available.

f. Day of PRT

(1) Prohibit tobacco use at site.

(2) Ensure drinking water is readily available at test site and all members are well hydrated before and after PRT.

(3) Prohibit participation of all ineligible members.

(4) Ensure environmental conditions (temperature, humidity, storm conditions, etc.) are safe.

(5) Ask members about general health. Specifically ask the following pre-physical activity questions:

(a) Has a health care provider ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?

(b) Do you feel pain in your chest when you do physical activity?

(c) In the past month, have you had chest pain when you are not doing physical activity?

(d) Do you lose your balance because of dizziness or do you ever lose consciousness?

(e) Do you have a bone or joint problem that could be made worse by a change in your physical activity?

(f) Is your health care provider currently prescribing drugs (for, example, water pills) for your blood pressure or heart condition?

(g) Have you taken any over the counter medications or nutritional supplement/performance enhancers in the past week?

(h) Do you know of any other reason why you should not do physical activity?

(6) Prohibit participation if recently recovered from a cold, flu, or other illness, or health changes that have occurred since completing PHA. Review symptoms of cardiac distress (chest pain, shortness of breath, arm and neck pain) and counsel participant to withdraw from test if symptoms occur.

(7) Conduct exercise events after warm-up and stretching is completed.

(8) Notify workplace supervisors of member's participation.

g. One to 3 weeks following PRT

(1) Enter PRT results into PRIMs.

(2) Provide command and members with PFA results for

(a) Inclusion in FITREPs and EVALs.

(b) Appropriate career counseling.

(c) Recognition of significant improvement or superior performance.

(d) Issuing of counseling and notification letters.

(e) Sending documents to NAVPERSCOM (PERS-31 or PERS-834).

(f) Sending injury reports to COMNAVSAFECEN.

**MEDICAL SCREENING AND WAIVERS**

1. Medical Screening

a. Current Physical Examination, PHA (reference (f)), PARFQ, medical referral and evaluation, waivers, and Operational Risk Management are primary tools to ensure safe participation of members in PFA and physical conditioning.

b. PRIMS is primary means of organizing and documenting Physical Readiness Program information including medical screening. CFL shall use PRIMS in execution of this instruction.

c. Current Physical Examination

(1) Members who do not have a required physical examination (reference (g)) shall not participate in a PRT or physical conditioning until such exam is completed. Members can participate in BCA.

(2) Verification of current physical examination shall be documented using PRIMS.

d. PHA

(1) Active duty members shall receive an annual PHA. PHA provides mechanism for clearance to participate in PFA for a 12-month period. As of January 2003, members who do not have current PHA shall not participate in PRT or physical conditioning until such assessments are completed. (Members without current PHA prior to January 2003 shall have current physical examination and clearance for PFA by a credentialed provider).

(2) Where mission/operational requirements permit, it is recommended that PHA be completed during member's birth month.

e. Reserve Personnel. Reserve personnel may be cleared for participation in the PRT for a 12-month period upon completion of the Annual Certificate of Physical Condition (NAVMED 6120/3) (short form physical) or a long form physical.

f. PARFQ

(1) CFL shall distribute PARFQ for review for each PHA. Members shall bring completed PARFQ to PHA appointment to facilitate clearance for participation in PFA, FEP and or physical conditioning.

(2) PARFQ questions are available online through PRIMS at website <https://prims.persnet.navy.mil/prims> or may be reproduced locally on a SF 600, Chronological Record of Medical Care.

(a) Section A

1. Are you a male greater than 40 years old or a female greater than 50 years old and do not participate in a consistent aerobic exercise activity three to five times weekly?

2. Has your mother or sister died without any explanation (sudden death) or suffered from a heart attack before the age of 55?

3. Has your father or brother died without any explanation (sudden death) or suffered from a heart attack before the age of 45?

4. Are you a current tobacco user?

5. Do you have high blood pressure or are you on blood pressure medication?

6. Has a doctor ever told you that you have high cholesterol or are you on cholesterol medication?

7. Do you have diabetes?

8. Are you sedentary (don't exercise at least three to five times per week for at least 30 minutes)?

9. Do you have any personal history of thyroid, renal, or liver diseases?

10. Have you ever passed out during exercise?

11. Have you ever been told you have a heart murmur?

12. Have you ever been dizzy or lightheaded during or after exercise?

13. Do you have known cardiac (heart) disease?

14. Has a health care provider ever denied or restricted your participation in sports?

15. Do you tire more quickly than your friends do during exercise?

(b) Section B Signs and Symptoms

1. Do you feel pain in your chest, neck, jaw, or arms when doing physical activity?

2. Do you experience any shortness of breath with moderate continuous exercise?

3. In the last month have you felt chest pain at rest?

4. Have you had a severe viral infection such as myocarditis or mononucleosis within the past month?

5. Have you experienced episodes of rapid beating or fluttering of the heart?

6. Have you unintentionally lost or gained more than 10 percent of your body weight since the last PFA?

7. Do you suffer from lower leg swelling of both legs?

8. Do you have difficulty breathing or have sudden breathing problems at night?

9. Do you have a bone, joint, or muscle problem that may prevent you from doing physical activity of any kind?

10 October 2002

(3) Members who answer "yes" to any question shall be assessed by a medical department representative (MDR) for further evaluation regarding participation in PFA or physical conditioning. MDR shall be a medical doctor, doctor of osteopathy, family or adult nurse practitioner, physician assistant, or independent duty corpsman.

(4) Pre-physical activity questions. At time of PRT, and immediately prior to any physical conditioning directed and supervised by command, members shall be asked by CFL or authorized representative about general health.

(a) Members who answer "yes" to any of the following questions shall be assessed by an MDR for further evaluation regarding participation in PRT or physical conditioning. (MDR shall be a Licensed Independent Provider, PA, or IDC).

1. Has your health care provider ever said that you have a heart condition and that you should only do physical activity recommended by a doctor?

2. Do you feel pain in your chest when you do physical activity?

3. In the past month, have you had chest pain when you are not doing physical activity?

4. Do you lose your balance because of dizziness or do you ever lose consciousness?

5. Do you have a bone or joint problem that could be made worse by a change in your physical activity?

6. Is your health care provider currently prescribing drugs (for, example, water pills) for your blood pressure or heart condition?

7. Do you know of any other reason why you should not do physical activity?

(b) Members recovering from recent self-limiting illness (such as a cold, gastrointestinal disturbance, minor injury) shall not participate in PRT or physical conditioning. Members may participate once episode subsides.

(c) Members reporting change in health or risk factors (such as tightness or discomfort in chest, arms or neck associated with activity or exercise) shall not participate in PRT or physical conditioning. CFL shall refer members to medical department for evaluation. Members must be cleared by MDR prior to participation in PRT or physical conditioning.

g. BCA

(1) Medical department must evaluate members prior to participation in PRT or physical conditioning upon initial failure to meet BCA standards. Evaluation shall include at a minimum

- (a) Blood pressure assessment.
- (b) Serum/plasma lipids, blood glucose, TSH.
- (c) Cardiovascular risk assessment.
- (d) Current medications, including over the counter drugs, supplements, herbals, and vitamins.
- (e) Tobacco use.
- (f) Family history, with particular focus on obesity and cardiovascular disease.
- (g) Current physical activity.
- (h) Motivation for weight loss.
- (i) Other assessments as medically indicated.

(2) A Licensed Independent Provider or PA shall document in medical record after evaluation any medical condition predisposing members to obesity. Members not found to have a medical condition predisposing them to obesity shall be referred to command for appropriate directing and monitoring of member's FEP.

(3) Written recommendations shall be provided to member's command regarding any physical activities in which members should not participate as well as specific activities in

10 October 2002

which members may safely participate. Members shall be provided with recommended weight loss targets and physical activity recommendations. Members may be referred to local weight control programs, stress management, tobacco use cessation programs, and specialty clinics as deemed appropriate. Recommendation for participation in Shipshape shall be made, if members qualify.

## 2. Medical Referral and Evaluation

a. Members shall be referred to medical department for evaluation and clearance to participate in PRT and physical conditioning if members:

- (1) Do not have required current periodic physical examination.
- (2) Do not have current PHA.
- (3) Answer "yes" to any question on
  - (a) PARFQ other than use of tobacco products, or
  - (b) Pre-physical activity questions.
- (4) Fail to meet BCA standards for first time in career.
- (5) Are 50 years of age or older and have not successfully completed all portions of a PRT in last 12 months. PRT must have been in conjunction with a PFA and documented.

b. CFL shall provide written referral clearly stating reasons members are referred. Use PRIMS.

c. Members who answer "yes" to any question on PARFQ and were previously cleared to participate for that response do not need to be referred on subsequent PFAs as long as

- (1) Condition has not worsened.
- (2) No new risk factors are present.

d. Completion of PARFQ by member shall be documented using PRIMS.

### 3. Medical Waivers

a. Command-approved members of medical department may recommend medical waiver for any aspect of Physical Readiness Program. Commanding officers shall appoint in writing those qualified members of medical department who are to conduct medical waiver evaluations. Appendix A of this enclosure provides guidance on medical procedure and shall be used to determine recommendations made to member's CO regarding waivers.

b. Members shall be issued medical waivers from participation in all or part of PFA or physical conditioning when a well-documented medical condition prevents

(1) Valid assessment of physical fitness in PFA, or

(2) Safe participation in PFA components or physical conditioning.

c. Medical waivers are subject to CO's final approval and shall be evaluated upon member's transfer to another command or change in CO.

d. Medical waiver recommendations shall be documented in writing

(1) PFA components (PRT or BCA) waived.

(2) Restrictions placed on participation in FEP (physical training).

(3) Recommended physical activities to help members maintain physical fitness and control body fat.

(4) Prohibited physical activities.

(5) Expiration date.

(6) In some circumstances where chronic injuries preclude participation in certain PRT events, an extended medical waiver may be warranted. If recommended by medical and approved by the CO an extended waiver may be granted. See appendix A to enclosure (3).

10 October 2002

e. Medical waivers from participating in all or part of PFA or physical conditioning are not waivers from other unspecified parts. For example, members waived from push-ups and curl-ups must participate in sit-reach, cardiovascular fitness assessment, and BCA.

f. Medical waiver recommendations from participation in BCA shall only be issued for members who are recuperating from a medical or surgical condition that interferes with accurate and valid measurement. Waiver recommendations shall

(1) Not exceed 6 months duration. Members requiring a waiver exceeding 6 months in duration shall be referred to Limited Duty/Medical Board (LIMDU/MEDBOARD) for further evaluation.

(2) Be in writing by a board eligible or certified specialist (e.g., surgeon, endocrinologist) and reviewed by the department head of the specialist recommending the waiver.

g. CFL shall document medical waiver specifications using PRIMS.

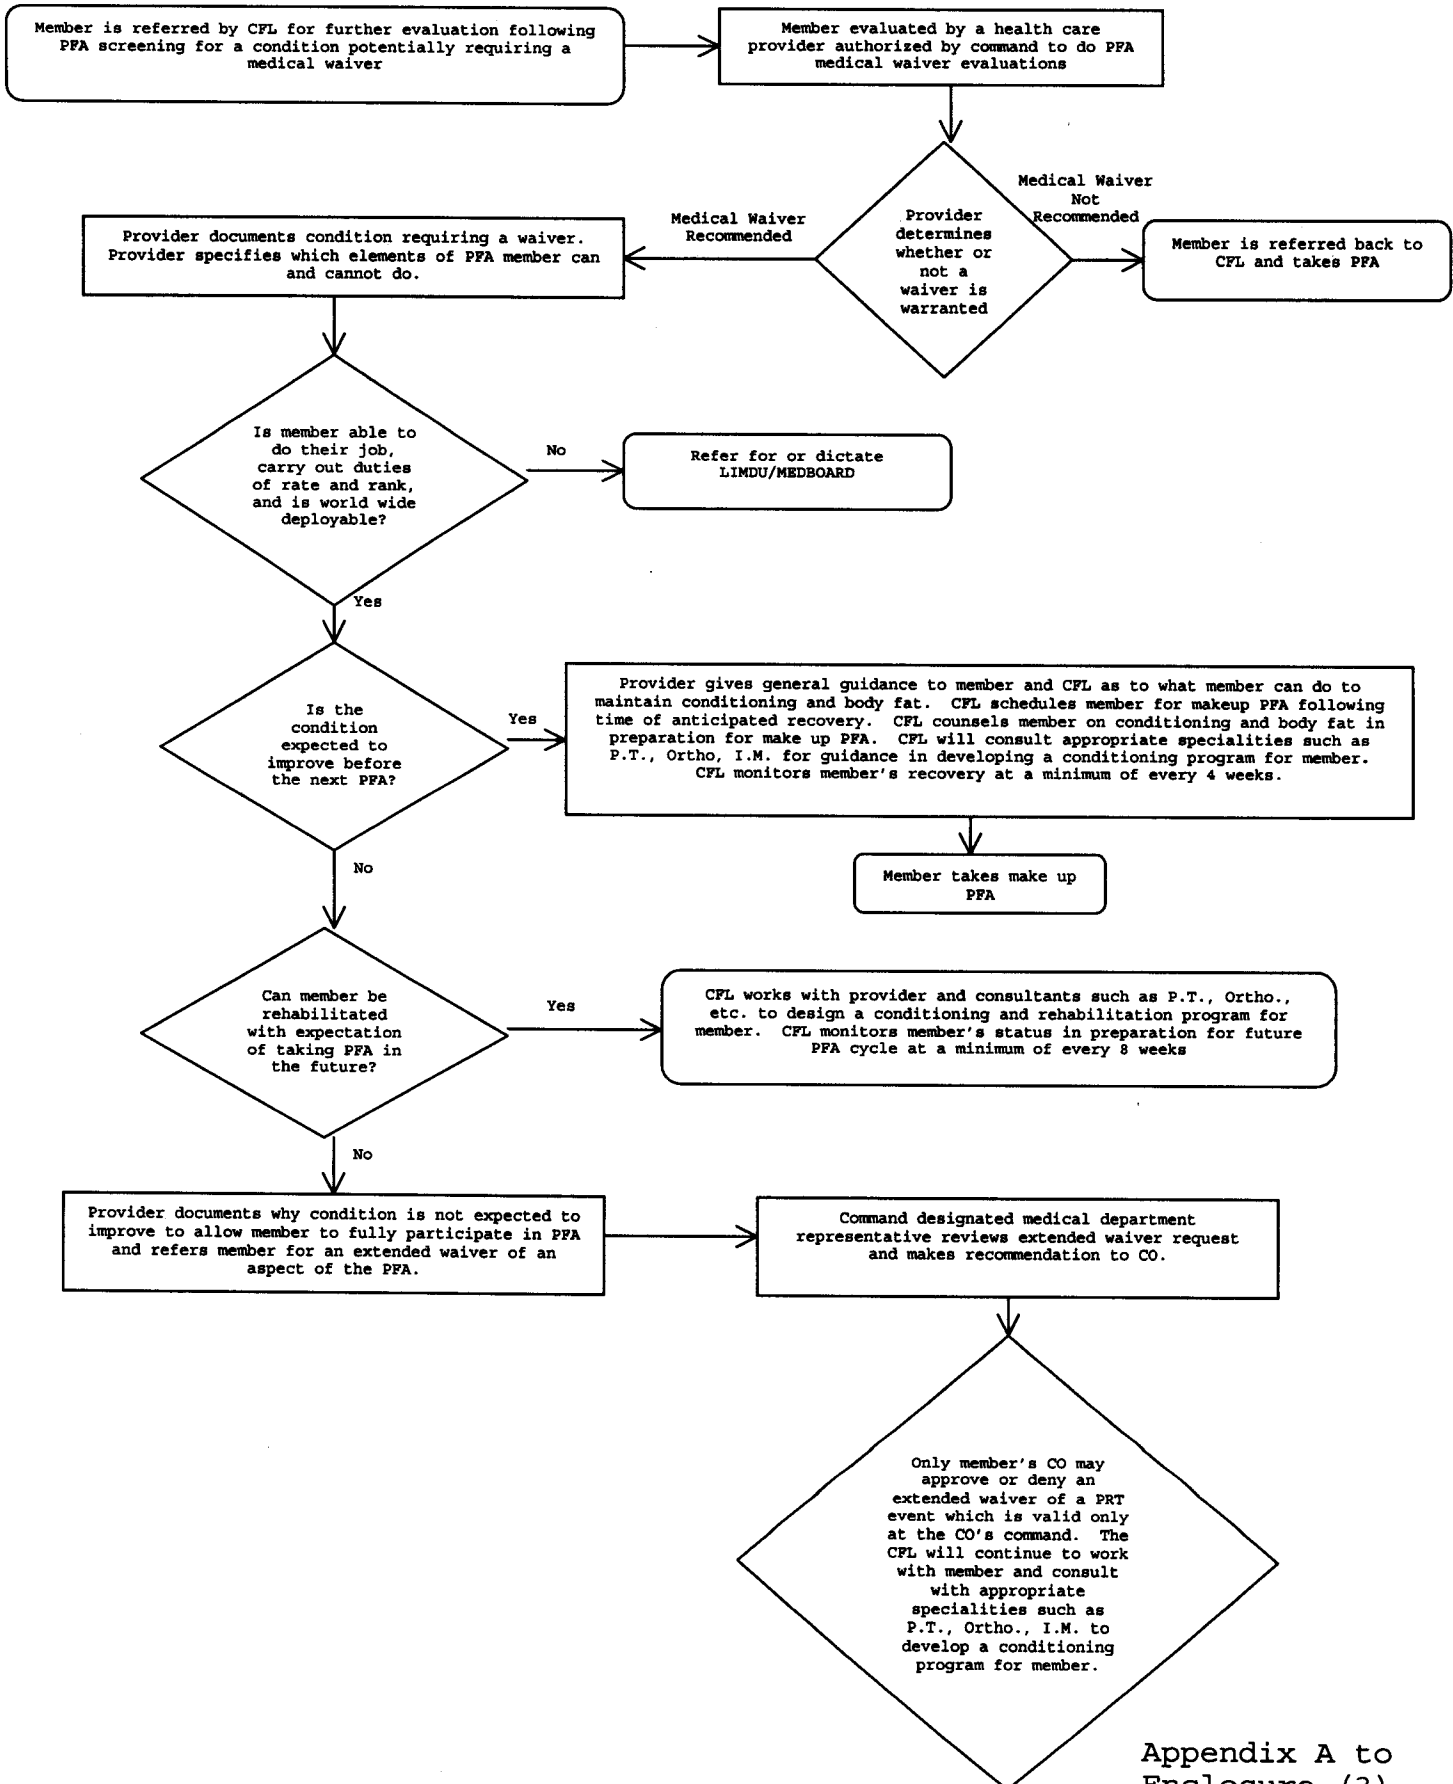

h. Pregnancy

(1) After confirmation of pregnancy by a health care provider, pregnant servicewomen shall not be required to meet PRT and BCA standards from the time the pregnancy is confirmed until 6 months following delivery.

(2) Pregnant servicewomen shall continue to participate in an ongoing exercise program as recommended by OB health care provider.

(3) Following the termination of a pregnancy (e.g., abortion, miscarriage), a medical evaluation by a health care provider should be obtained to determine whether or not a servicewoman may participate in physical conditioning, FEP, and/or a regularly scheduled PFA.

# MEDICAL PROCEDURE RECOMMENDATION

## CONDITIONING AND TEST SAFETY

1. Risk of Injury. Participation in physical activity, even those related to improving health status, pose a risk of injury. The environment and the characteristics of the participants also contribute to the overall injury risk. Members must be informed of these risks and taught how to minimize the possibility of injury.

### 2. Responsibilities

a. COs shall ensure proper safety precautions, outlined in this enclosure, are followed during PFA, FEP, and any command physical activities.

b. CFL shall follow all safety precautions outlined in this enclosure, and develop a safety plan for summoning emergency medical assistance. CFL shall also coordinate activities with safety officer, MWR, and medical representatives.

#### c. Commands shall

(1) Ensure member's level of physical fitness including acclimatization to environment is appropriate for the physical demands required of PT, PRT, and other physical activities.

(2) Prohibit participation in PT, PRT, or other physical activity of members who do not participate in a physical conditioning program that requires members to consistently achieve exercise intensity comparable to the physical demand required of PT, PRT, and other physical activities.

### 3. Safety Concerns Prior to Conducting PRT

#### a. Operational Risk Management (ORM)

(1) An ORM analysis shall be completed at least 24 hours prior to PRT. The ORM process should use the "what if" tool and must include all aspects of the scheduled PRT, from individual's medical or physical condition, current medications, etc., to terrain, weather, back-up emergency communications, etc.

(2) Steps shall be taken to ensure all known risks are eliminated to the maximum extent possible. Controls shall be

10 October 2002

put in place to reduce, to an acceptable level, any risks still existing. It is recommended that the ORM process be documented, and that the appropriate level of authority within the chain of command be given the opportunity to make risk decisions.

(3) Steps should be taken to ensure a "change analysis" is conducted anytime there is a significant change in any portion of the PRT. Guidelines on conducting a successful ORM analysis may be found in reference (h) and COMNAVSAFECEN web page: <http://www.safetycenter.navy.mil>.

b. Additional guidelines for safe conduct of PRT and physical exercise may be found at the following web site: <http://www.mwr.navy.mil>.

c. Members must have a current, documented physical examination, PHA, and clearance by medical department in order to participate in PRT, FEP, or command-supervised physical training.

d. BCA

(1) Shall normally be completed within 10 days of, but absolutely not less than 24 hours prior to member's participation in PRT.

(2) Members who fail BCA for first time in career shall be referred to medical department prior to participating in PRT, FEP, and physical training.

e. Support Personnel

(1) CPR Monitors. At least one CPR-certified monitor shall be present for every 25 members participating in PRT, with a minimum of two monitors for every test. Monitors do not have to be Hospital Corpsmen; they shall not be test participants.

(2) Medical Emergency Assistance. A safety plan shall be in place for summoning emergency assistance. Consult local medical facility for guidance. At a minimum, the plan shall include telephone numbers and procedures for summoning aid, clear directions for emergency response personnel that will avoid confusion and ensure their prompt arrival, and guidance

for contacting base security personnel to assist with rapid access of emergency personnel to test site.

f Test Site Selection/Certification

(1) Select the most level 1.5-mile course available. Course should be free of steep inclines and declines, surface irregularities, and sharp turns.

(2) Verify or measure course distance with measuring wheel (usually available from recreation services). A bike odometer may only be used if measuring wheel is not available. Do not use automobile or motorcycle odometers.

(3) CPR-certified personnel shall be placed at appropriate intervals so entire course is in view of monitors.

(4) Test site must be accessible to emergency vehicles and must be near telephone to facilitate notification of emergency services if needed. Cellular phones, walkie-talkies, etc. are acceptable.

g. Pool Safety. When swim is conducted for the PRT, at least one certified lifeguard must be present.

4. Safety Concerns During PRT

a. Weather Conditions. PRT shall not be conducted under harsh environmental conditions. Specifically, PRT should not be conducted outdoors when wind chill is 20 degrees F or lower, or when hot weather "black flag" conditions exist (wet bulb globe temperature (WBGT) of 90 degrees or higher). Guidance for conducting physical activity (PRT, FEP, and physical training) under various environmental conditions is available in reference (i).

b. Health Questions. Immediately prior to participating in PRT or physical conditioning, members shall be asked about general health. Members recovering from recent illness or reporting a change in health or risk factors (specifically, a tightness or discomfort in the chest, arms, or neck associated with activity or exercise) shall not be tested. Members reporting a change in risk factors shall report to medical for evaluation.

c. CFLs. CFLs shall review symptoms of cardiac distress (chest pain, shortness of breath, arm and neck pain) and direct members to withdraw from PRT if symptoms occur. Immediately contact medical department regarding these individuals. Members shall be tested later after medical clearance.

d. Conducting at higher elevation. Commands shall institute all appropriate safety measures to minimize risk of injury to personnel exercising at increased elevation. Appropriate safety measures shall include, but are not limited to: avoiding or minimizing use of alcohol and other diuretics; ensuring adequate amounts of drinking water are readily available; ensuring all personnel are well hydrated prior to physical exercise; increasing monitoring of personnel, particularly those testing positive for sickle cell trait; and increasing availability of medical support.

e. Warm Up. Participation in 5-10 minutes of warm-up exercise is required before beginning the PRT events. Refer to enclosure (5) for recommended exercises.

f. Clothing. Proper attire for PRT should include running shoes and clothing that is appropriate for weather conditions. Combat type boots and rubberized suits are NOT appropriate and may put member at risk for injury.

g. Hydration. Adequate fluid intake is vital to safe participation in PRT and physical exercise. Members are encouraged to drink water before and after PRT and physical activity, especially in hot weather.

h. Smoking/Tobacco Use. PRT shall be conducted in a smoke-free environment; PRT participants and monitors shall not smoke or use tobacco products during entire PRT testing period. To reduce health risks to participants, smoking and use of all tobacco products should be discouraged at least 30 minutes before and at least 15 minutes after PRT.

i. Cool-Down. At end of PRT, members should let heart rate decline gradually. This is best accomplished by walking slowly, if completing the run portion of PRT. If swimming, member should walk back and forth across shallow end of pool. Cool-down should last at least 5 minutes. Without cool-down, member may become dizzy or light-headed.

OPNAVINST 6110.1G  
10 October 2002

j. Injury Reporting. When members are injured during PRT or any other command-authorized or personal physical training, command safety officers shall report injuries to COMNAVSAFECEN, using guidance contained in chapter 14 of reference (j). Include as information addressees BUMED (MED-02), NAVPERSCOM (PERS-651F), and Naval Health Research Center (NHRC).

10 October 2002

**FITNESS ENHANCEMENT AND WEIGHT MANAGEMENT PROGRAMS**

1. Program Requirements. Effective leadership is critical to success of a command's Physical Readiness Program. All leaders must understand goals of program and be visible and active practitioners of physical fitness. Responsibility for an effective program rests with leadership.

a. COs shall ensure that regular physical training sessions and physical activity become part of daily routine for all Navy members unless medically restricted.

b. The purpose of physical training and daily physical activity is to

(1) Increase overall fitness of Navy personnel.

(2) Ensure safe and effective execution of daily and emergent tasks.

(3) Ensure safe participation in physical activity (organized command physical training, personal training, recreational activities, and PRT).

c. Members shall maintain a healthy and physically active lifestyle, including

(1) Participation in at least three moderately intense physical training sessions per week.

(2) Maintaining a prudent diet. Refer to reference (e) for serving sizes and more information.

d. Commands and members share responsibility for physical fitness. Benefits of regular physical activity are in the best interests of individuals and Navy.

(1) Commands shall incorporate mission and readiness enhancing physical fitness training into normal duty days, consistent with mission requirements.

(2) Organizational, operational, and personal schedules and duties shall be structured to promote use of normal work hours for physical fitness.

(3) Members may also use off-duty time for physical fitness activities.

2. Resources. Members who seek to achieve optimum physical fitness to develop a healthy lifestyle or to meet Physical Readiness Program standards have a variety of command- and Navy-sponsored programs at their disposal. CFL, FEP, ShipShape, and MWR facilities and fitness professional can aid in structuring a member's FEP to produce the greatest benefit.

3. FEP

a. A FEP is the means through which members improve health and physical fitness using regular physical activities, healthy nutrition, and learning of self-help strategies. A FEP is not exclusively for members who do not meet PFA standards.

b. If medically cleared, a member's participation in FEP shall be monitored and directed by commands when members

(1) Exceed Navy upper allowable limit for body fat percentage.

(2) Do not meet or perform better than Navy PRT standards.

(3) Have a body fat percentage equal to age-adjusted standard and score less than "Good-Low" on any PRT event.

(4) Have an overall PRT score of "Probationary".

(5) Are waived from one PRT exercise event and score "probationary" on each of the other two events.

(6) Are waived from two PRT exercise events and score "probationary" on the third event.

c. Participation and monitoring shall continue until members pass two consecutive PFAs with body fat percentage below age adjusted standard and PRT performance of "Good-Low" or better on all events.

d. FEP Characteristics. An effective FEP includes

10 October 2002

(1) Activities tailored for body fat loss for members who exceed or are in danger of exceeding BCA standards.

(2) Activities to improve aerobic fitness, muscular strength and endurance, and flexibility.

(3) Methods of monitoring and directing member's participation and improvement

(a) Administration of this requirement should be delegated to lowest possible level to allow integration into work schedule with minimal disruption.

(b) Shall be structured so participating members meet or exceed requirements of PFA.

(c) Commands may require a logbook, direct observation, or unit activities to ensure members use duty time in a manner consistent with this requirement. Direct observation is the best indicator of meeting this requirement.

(4) Nutrition education.

(5) Completion of Navy Nutrition and Weight Control Self-Study Guide when members exceed or are in danger of exceeding BCA standards.

(6) Coordinated activities with local and Navy health promotion programs, including Shipshape.

(7) Weekly determinations of body weight and monthly BCAs and PRTs to monitor progress. (FEP BCAs and PRTs do not constitute a PFA.)

(8) Activities beyond regimented, group calisthenics and formation runs.

(9) Activities for and monitoring of members who return to standards.

(10) Provides members with proper amounts of knowledge, self-discipline, command direction, and monitoring to habituate a healthy lifestyle and mission accomplishment.

(11) Is part of command structure.

(12) Employs a variety of leadership skills and training activities.

e. Physical Training (PT)

(1) PT sessions shall be conducted three to five times per week.

(2) PT sessions shall include activities that promote physical conditioning (moderately intense aerobic, muscular strength and endurance, and flexibility) and are enjoyable so life-long physical activity is fostered. Recreational sports can be included periodically.

(3) A training session shall include

(a) Five to ten minutes of proper warm-up and stretch activities.

(b) Aerobic exercise (resulting in the accumulation of at least 30-40 minutes with heart rate within target training zone).

(c) Flexibility exercises.

(d) Muscular strength and endurance conditioning.

(e) Cool-down activities.

(4) Muscular strength and endurance conditioning should be included as well, but should not become sole focus of required conditioning periods.

(5) Suggested initial maximum for required PT is four sessions per week, 60 minutes duration; members who exceed this maximum are at risk of injury.

(6) Proper attire for PT should include appropriate footwear and clothing suitable for weather conditions. Vinyl, plastic, or rubber (solar) suits to increase sweating, and

10 October 2002

running or jogging in combat, flight or similar boots may put members at risk for injury and are not appropriate for general PT.

#### 4. PT Principles

a. To promote a lifelong commitment to physical activity and optimum physical fitness and health, an understanding and balanced application of physical training principles is required.

b. Frequency, Intensity, Time and Type (FITT) of exercise factors for a successful conditioning program.

(1) Frequency - physical activity should be conducted three to five times a week for optimal improvement.

(2) Intensity - strenuousness of activity.

(a) Muscular strength and endurance activities.  
Intensity refers to percentage of maximum resistance (weight) used.

(b) Aerobic activities

1. Target heart rate can be used to gauge work intensity.

2. Compute a target heart rate training zone by taking member's age and subtract it from 220. This number is average maximum heart rate. Take average maximum heart rate and multiply by 60 and 75 percent (multiply maximum by 0.60 and 0.75). This yields target heart rate training zone that should be maintained during every aerobic exercise period. Heart rate can be determined by feeling heartbeat pulse at wrist or on neck just below angle of jaw.

3. The following are target heart rate training zones computed at 60 to 75 percent of maximum heart rate for people of different ages:

10 October 2002

AGE	TARGET HEART RATE TRAINING ZONE	AVERAGE MAXIMUM HEART RATE
20	120-150 (20-25) *	200
25	117-146 (20-24)	195
30	114-142 (19-24)	190
35	111-138 (19-23)	185
40	108-135 (18-22)	180
45	105-131 (18-22)	175
50	102-127 (17-21)	170
55	99-123 (17-20)	165
60	96-120 (16-20)	160
*Numbers in parentheses represents appropriate range for heart rate counted over a 10-second period.		

(3) Time - time spent on activity

(a) Aerobic activities - 20-30 minutes must be spent for optimal improvement.

(b) Muscular strength activities - three to eight repetitions should be performed for optimal improvement.

(c) Muscular endurance activities - 12 or more repetitions should be performed for optimal improvement.

(d) Flexibility - following adequate warm-up, each stretch should be held for 10-15 seconds and 30-60 seconds during cool-down.

(4) Type - kind of exercise performed

(a) Cardiovascular fitness activities are continuous, rhythmic, and involve large muscle groups. Recommended activities include running, brisk walking, swimming, cycling, stair-climbing, jumping rope, aerobic dance, step routines, rowing, skating, cross-country skiing, and hiking.

(b) Muscular strength and endurance activities are intermittent and involve specific muscle groups. Recommended activities include free weight lifting, resistance-machine workouts, and calisthenics.

c. Body fat decreasing activities.

10 October 2002

(1) Curl-ups, sit-ups, or abdominal crunches will not reduce size of abdominal or natural waist measurement. Waist measurement decreases as overall body fat is lost.

(2) Loss of fat is promoted by continuous, low to moderate intensity aerobic activities performed for 40 or more minutes four or more days per week. If a continuous 40 minute period is not feasible, roughly the same result may be gained by accumulating 40 minutes of exercise over several periods, for example, two 15 minute sessions and one 10 minute session.

(3) If exercise is too difficult, it is unlikely to be continued long enough to consume stored fat. Also, a slower pace (brisk but not breathless) is more tolerable and more likely to promote exercise sessions throughout the year. Members should be able to talk to exercise partner without much difficulty.

(4) Weight training should be included in a body fat reduction program. Lifting weights or using resistance machines helps maintain or increase muscle, and muscle consumes energy even at rest. Increasing muscle can reduce body fat percentage, even if body weight does not change very much; however, resistance training only complements long duration aerobic activity and should not be relied on to reduce overall body fat.

(5) A critical element of weight or body fat control and optimal physical performance is proper nutrition. Navy does not condone extreme or starvation diets.

d. Warm-up and cool-down activities. Examples of recommended warm-up exercises follow:

(1) Walk/Jog

(a) Intermittent activity (30 second walk; 30 second jog).

(b) Two to five minutes total.

(2) Whole body calisthenics

(a) Jumping jacks.

(b) Low repetitions.

- (c) Adequate rest or walking between exercises.
- (3) Body segment calisthenics
  - (a) Push-ups, curl-ups, etc.
  - (b) Low repetitions.
  - (c) Adequate rest or walking between exercises.
- (4) Flexibility

(a) Hip flexor stretch: Kneel as shown with hands on knee. Slowly push hips toward the floor. Hold 20 seconds. Switch legs and repeat.

(b) Groin stretch: Sit with soles of feet together as shown, with hands around feet. Sit up straight and press

knees toward floor. Lean forward and hold 20 seconds. Relax and repeat.

(c) Lower back stretch: Lie on back as shown. Pull one knee toward chest. Hold 20 seconds. Do twice for each leg.

(d) Quadriceps stretch: Lie on stomach as shown. Pull foot toward buttocks. Hold 20 seconds. Do twice for each leg.

(e) Achilles tendon and calf stretch: Stand facing

10 October 2002

wall. Place palms of hands flat against wall. Feet should be about 12 inches apart. Bend right knee with left leg straight behind. Keep left heel on floor with toes pointing straight ahead. Slowly move hips forward until a stretch is felt in calf of left leg. Hold for 15-30 seconds. Repeat with right leg. Stretch should be felt in calf and Achilles tendon. Variation: Begin in position described above. Bend left knee (rather than keeping it straight), keeping heel on floor. Stretch should be felt in Achilles tendon.

5. ShipShape (BUMED-approved Weight Management Program)

a. Shipshape offered by medical department is designed to provide personnel with basic knowledge of nutrition and effective techniques for healthy eating.

b. Attendance is open to personnel who exceed or are in danger of exceeding BCA standards, and are recommended by Cos.

c. Upon completion of Shipshape

(1) Members and commands shall receive a course summary that includes a plan identifying goals and means of monitoring progress. If not provided, CFLs shall request a copy from program administrator. CFLs shall enter results of FEP-required BCAs and PRTs in PRIMs.

(2) COs shall monitor members following program completion.

(a) Member's body composition shall be assessed regularly, at a minimum, on a monthly basis.

(b) Members shall receive appropriate support and access to MWR, medical department, and other organization facilities and staff to meet goals of plan.

(3) Requirements of weight management program, such as dietary discretion and physician-recommended exercise, shall continue to be followed for members with normal, low-risk pregnancy.

**BODY COMPOSITION ASSESSMENT (BCA)**

1. Background and Rationale

a. In 1985, a panel of experts at the National Institute of Health (NIH) determined the extent to which excess body fat is associated with negative health consequences. Negative health consequences include an increased risk of high blood pressure, diabetes, cancer, and cardiovascular disease. Excess body fat is also associated with the inability to maintain physical performance (especially in hot climates) and may be correlated with a lack of fitness and stamina. Although body fat typically increases with age in Americans, it is not a healthy process, and frequently is simply the result of decreased activity and or dietary indiscretion.

b. Based on scientific research the NIH conference defined obesity as the amount of body fat associated with significant detrimental health effects. This corresponded to a weight-for-height 20 percent above the midpoint weight for a medium-frame individual, based on the 1983 Metropolitan Life Insurance Height-Weight Tables. Naval Health Research Center (NHRC) scientists reviewed this and numerous other scientific studies and recommended the NIH definition of obesity as the upper limits for Navy standards. Since DOD prescribes body fat percentage as the measure of body composition, NHRC determined upper allowable Navy limits to correspond to 22 percent for men and 33 percent for women. Most members should have a significantly lower level of body fat than the upper allowable Navy limits.

2. Purpose

a. Provide members with goals to promote basic physical fitness, health, and readiness.

b. Provide command a means of assessing the general fitness of members of command.

10 October 2002

### 3. Maximum Allowable Body Fat Percentages

a. Age-adjusted maximum allowable Navy body fat percentages are

	Age (years)	
	17-39	40-40+
Male	22%	23%
Female	33%	34%

b. Most personnel should have a significantly lower percentage of body fat.

### 4. BCA Procedures

#### a. Maximum weight for height screening

##### (1) Height measurement

(a) Member removes shoes.

(b) Member stands with feet together, flat on the deck, takes a deep breath, and stretches tall.

(c) Record height. Fractions of an inch in height shall be rounded up to the nearest half-inch.

##### (2) Weight measurement

(a) Member shall be weighed on a balance beam or digital scale in PT-type clothing (shorts, T-shirt) without shoes.

(b) One pound deduction is made for clothing, regardless of how member is dressed.

(c) Record weight. Fractions of a pound in weight shall be rounded down to nearest whole pound.

##### (3) Maximum weight determination

(a) In center column of maximum-weight-for-height table (appendix A of this enclosure), find smallest value equal to or exceeding member's height.

(b) If member's weight is less than or equal to the maximum weight listed for their gender, members are within body composition assessment standards and percentage body fat determination is not required.

b. Body fat percentage determination

(1) Non-stretching cloth, metal, or fiberglass tape measure shall be applied to body landmarks with sufficient tension to keep it in place following the contour of the body without indenting skin surface. All measurements will be taken on the right side of the body.

(2) Procedures for Men

(a) Body fat percentage for men is calculated from measurements of standing height, neck circumference, and abdomen circumference.

(b) Members shall be measured in presence of another member (preferably of member's sex), if requested.

(c) Standing height. Use height measurement from maximum weight for height screening.

(d) Neck circumference

1. Measurement shall be taken on bare skin.

2. Members look straight ahead with shoulders down (not hunched).

3. Measure neck circumference at a point just below larynx (Adam's Apple) perpendicular to long axis of neck.

4. Round neck measurement up to nearest 1/2 inch and record (e.g., round 16 1/4 inches to 16 1/2 inches).

(e) Abdomen circumference

1. Measurement shall be taken on bare skin.

2. Arms are at sides. Take measurement at end of member's normal, relaxed exhalation.

3. Measure abdominal circumference with tape at level of center of navel and parallel to deck.

4. Round abdominal measurement down to nearest 1/2 inch and record (e.g., round 34 3/4 to 34 1/2 inches).

(f) Body fat calculation

1. Subtract neck circumference from abdominal circumference to obtain member's circumference value.

2. On appropriate percent fat estimation table (appendix B of this enclosure) find intersection of column equal to member's height (rounded up to nearest half inch) and row equal to member's circumference value.

3. Member's body fat percentage equals number at intersection of row and column. For circumference value less than value in table, body fat percentage is less than or equal to smallest body fat percentage in column. For circumference value greater than value in table, body fat percentage is greater than or equal to largest body fat percentage in column.

(3) Procedure for Women

(a) Body fat percentage for women is calculated from measurements of standing height, neck circumference, natural waist circumference, and hip circumference.

(b) Members shall be measured in presence of another member (preferably of member's sex), if requested.

(c) Standing height. Use height measurement from maximum weight for height screening.

(d) Neck circumference

1. Measurement shall be taken on bare skin.

2. Members look straight ahead with shoulders down (not hunched).

3. Measure neck circumference at a point just below larynx (Adam's Apple) perpendicular to long axis of neck.

4. Round neck measurement up to nearest 1/2-inch and record (e.g., round 16 1/4 inches to 16 1/2 inches).

(e) Natural waist circumference

1. Measurement shall be taken on bare skin.

2. Arms are at sides. Take measurement at end of member's normal, relaxed exhalation.

3. Measure natural waist circumference, at point of minimal abdominal circumference with tape level and parallel to deck. (Note: This site is usually located about halfway between navel and lower end of sternum breastbone. When this site is not easily observed, take several measurements at probable sites and use smallest value).

4. Round natural waist measurement down and record to nearest 1/2 inch (e.g., round 28 5/8 inches to 28 1/2 inches).

(f) Hip circumference

1. Measurement shall be taken over lightweight loose-fitting gym shorts or pants. Tight-fitting rubberized foundation garments or exercise belts shall not be worn at least 30 minutes before measuring. Control-top panty hose, spandex tights, and other "shaping" garments shall not be worn during measuring.

2. While facing member's right side measure hip circumference by placing tape around hips so that it passes over greatest protrusion of gluteal muscles (buttocks) as viewed from side. Ensure tape is level and parallel to deck. Apply sufficient tension on tape to minimize effect of clothing.

3. Round hip measurement down to nearest 1/2-inch and record (e.g., round 44 and 3/8 inches to 44 inches).

(g) Body fat calculation

1. Add waist and hip circumferences, then subtract neck circumference to obtain member's circumference value.

2. On appropriate percent fat estimation table (appendix B of this enclosure), find intersection of

10 October 2002

column equal to member's height (rounded up to nearest half inch) and row equal to member's circumference value.

3. Member's body fat percentage equals number at intersection of row and column. For circumference value less than value in table, body fat percentage is less than or equal to smallest body fat percentage in column. For circumference value greater than value in table, body fat percentage is greater than or equal to largest body fat percentage in column.

#### 5. Grading BCA

a. BCA is failed (not within BCA standards) when members exceed both maximum weight for height and body fat percentage allowed for member's age and gender.

b. BCA is passed (within BCA standards) when members

(1) exceed maximum weight for height, but not maximum body fat percentage allowed for member's age and gender.

(2) do not exceed maximum weight for height allowed for member's age and gender.

(3) meet or are less than maximum weight for height and maximum body fat percentage allowed for member's age and gender.

10 October 2002

\* Circumference value = natural waist + hip - neck circumference (in inches)

## **PHYSICAL READINESS TEST (PRT)**

### **1. Background and Rationale**

a. Navy's culture of fitness includes an all hands commitment to well-rounded, regular physical conditioning, and healthy food choices. The PRT is simply one element of a total health, physical fitness, and readiness program. Minimal satisfactory performance on the PRT establishes a base level of physical capacity essential for every member, regardless of designator, Navy Enlisted Classification (NEC) or duty assignment. All personnel shall strive to optimize fitness and readiness by exceeding minimum standards and achieving continual improvement.

b. Standards are based on a sample of PRT results from over 200,000 members in the Fleet during PRTs from 1997 and 1998. NHRC San Diego completed data analysis and computed proposed PRT standards. Results of Navy personnel were divided into groups based on gender and age. Separate standards were developed for each gender within each age group. Standards for each performance category are approximately as follows:

(1) OUTSTANDING - Performance above or equal to top 10 percent.

(2) EXCELLENT - Performance in top 25 percent, but less than OUTSTANDING.

(3) GOOD - Performance better than or equal to lowest 25 percent, but less than EXCELLENT.

(4) SATISFACTORY/PROBATIONARY - Performance in bottom 25 percent, but above lowest 10 percent.

(5) UNSATISFACTORY - Performance in lowest 10 percent.

### **2. Purpose of PRT Events**

a. Provide members with goals to promote basic physical fitness, health, and readiness.

b. Provide COs a means of assessing the general fitness of members of their command.

10 October 2002

3. Components of PRT. Navy assesses physical fitness by a series of events associated with factors that enable members to perform physically. Factors evaluated and associated physical activity are as follows:

a. Flexibility. Flexibility is the ability of a joint to move through the full range of motion. Lack of flexibility is associated with an increased risk of injury. Although no single test measures the flexibility of all joints, sit-reach event serves as an important functional measure of hip region flexibility including lower back and back of legs.

b. Muscular endurance. Muscular endurance is the ability to sustain muscle contractions over a period of time without undue fatigue. Curl-up and push-up events are indicators of muscular endurance. No single endurance test measures the endurance of all muscles; however, curl-ups serve as a measure of abdominal muscle endurance while push-ups indicate upper body muscular endurance. The curl-up exercise, when performed properly, is important in developing abdominal muscle tone. Adequate strength and endurance of abdominal muscles are an important element in prevention and treatment of lower back injury, which is associated with the ability to perform common pushing, pulling, and carrying tasks.

c. Cardiovascular endurance. Cardiovascular endurance or aerobic capacity is the ability of the heart and lungs to deliver oxygen to working muscles. It is associated with the ability to carry out strenuous work throughout the workday without undue fatigue. One and a half mile run/walk and 500-yard/450-meter swim are included in the PRT because performance in these events is indicative of aerobic capacity.

4. Event sequence

a. PRT events shall be completed on same day, in the following sequence: warm-up, sit-reach, curl-ups, push-ups, cardiovascular event (run/walk or swim), and cool-down.

b. Events shall be performed allowing at least 2 minutes, but no more than 15 minutes between events.

5. Event procedures

a. Sit-reach

(1) Ensure proper warm-up and stretching is done prior to testing.

(2) Sit on deck, legs extended, knees very slightly flexed, feet together, and toes pointed up. Shoes are optional.

(3) Reach slowly forward and touch toes with fingertips of both hands simultaneously.

(4) Hold reach for one second. Do not bounce or lunge.

b. Curl-ups

10 October 2002

(1) Event shall be conducted with partner on a level surface on a blanket, mat, or other suitable padding. Shoes are optional.

(2) Curl-ups are conducted as follows:

(a) Participants shall start by lying flat on back with knees bent, heels about 10 inches from buttocks. Arms shall be folded across and touching chest with hands touching upper chest or shoulders.

(b) Feet shall be held to floor only by partner's hands.

(c) Timer shall signal start for participants and call out 15-second time intervals until two minutes have elapsed.

(d) Participants curls body up, touching elbows to thighs while keeping hands in contact with chest or shoulders.

(e) After touching elbows to thighs, participants lie back, touching lower edge of shoulder blades to deck.

(f) Participants may rest in either up or down position.

(3) Curl-ups are repeated correctly as many times as possible in 2 minutes. CFL or assistant CFL monitors participants for correct form and counts number of correctly performed curl-ups. Incorrectly performed curl-ups shall not be counted. Results for event ended in less than two minutes shall be the number of curl-ups properly completed at time of termination.

(4) Event is ended if participant

(a) Lowers legs

(b) Raises feet off ground or floor

(c) Lifts buttocks off ground or floor

(d) Fails to keep arms folded across and touching chest.

(e) Fails to keep hands in contact with chest or shoulders.

c. Push-ups

(1) Push-ups shall be performed on a firm or suitably padded, level surface. Shoes are optional.

(2) Push-ups shall be performed as follows:

(a) Participant shall begin in "front-leaning rest" position, palms of hands placed on floor directly beneath or slightly wider than shoulders. Both feet together on floor.

(b) Back, buttocks, and legs shall be straight from head to heels and must remain so throughout test. Toes and palms of hands shall remain in contact with floor. Feet shall not contact a wall or other vertical support surface.

(c) Timer shall signal start for participants and calls out 15-second time intervals until two minutes have elapsed.

(d) Participants shall lower entire body as a single unit by bending elbows until upper arms, shoulders, and lower back are aligned and parallel to deck.

(e) Participants shall return to starting position by extending elbows, raising body as a single unit until arms are straight.

(f) Participants may rest only in up position while maintaining arms, back, buttocks, and legs in straight position.

(3) Push-ups are repeated correctly as many times as possible in two minutes. CFLs or assistant CFLs monitor participants for correct form and counts correctly performed push-ups. Incorrect push-ups shall not be counted. Results for event ended in less than two minutes shall be number of push-ups properly performed at time of termination.

(4) Event is ended if participant

(a) Touches deck with any part of body except hands and feet.

(b) Raises one or both feet or hands off deck or ground.

(c) Fails to maintain back, buttocks, and legs straight from head to heels.

d. 1.5-mile run/walk

(1) Event consists of running or walking 1.5 miles as quickly as possible. Any combination of running or walking is allowed to complete event.

(a) Event shall be conducted on a flat and solid surface.

10 October 2002

(b) At CO's discretion event may be conducted on treadmill where appropriate facilities and equipment are reasonably available. Treadmill shall have following features:

1. Motor-driven running surface belt with emergency stop button.
2. Adjustable speed displayed in miles per hour.
3. Inclination adjustment.
4. Odometer that accurately measures distance traveled in miles.

(2) Event shall be conducted on a track or outdoor course as follows:

- (a) Participants shall stand at start line.
- (b) Timer shall signal start and call out time intervals until completion of test.
- (c) Time is recorded with stopwatch to nearest second.

(3) Event shall be conducted on a treadmill as follows:

- (a) Participants straddle treadmill belt with treadmill inclination set to 1.0 percent.
- (b) Timer shall signal start and participant starts treadmill at desired speed.
- (c) Timer calls out time intervals until completion of test.
- (d) Time is recorded with stopwatch to nearest second.
- (e) Treadmill speed may be adjusted to participant's comfort anytime during test.
- (f) Touching bar with fingertips or open palm for safety to recover balance is acceptable.

(4) Event is ended if participants

(a) stops running or walking other than to retie shoelace or remove foreign object from shoe.

(b) completes 1.5 miles.

(c) changes treadmill inclination from 1.0 percent.

(d) supports body weight using arms, hands, torso, or any mechanical device.

e. 500-yard or 450-meter swim

(1) Event consists of swimming 500 yards or 450 meters in fastest time possible. Any swim stroke and turn may be used.

(2) Event shall only be conducted in a standard 25 or 50 yard/meter swimming pool.

(3) Swim event shall be conducted as follows:

(a) Swimmers begin test in water.

(b) Timer shall signal start and call out time intervals or lengths until completion of test.

(c) Time is recorded with stopwatch to nearest second.

(d) Swimmers may push off from sides with hands and feet after each pool length.

(e) Resting is permitted by holding side of pool, standing, or treading water.

(f) Swimmers may use goggles, facemasks, swim caps, and or ear plugs. Fins, snorkels, flotation, wet suit, and propulsion device are not allowed.

(7) Event is ended if participants

(a) completes prescribed distance.

10 October 2002

(b) moves forward while resting.

(c) receives or requires assistance from lifeguard or other person.

## 6. Options

a. COs may allow swim event if facilities are reasonably available.

b. If medically cleared, members shall participate in 1.5 mile run/walk unless COs authorize swim event.

c. Members who are medically waived from 1.5-mile run/walk are not required to participate in swim event.

d. COs may permit 1.5-mile run/walk to be conducted on a treadmill if equipment is reasonably available.

## 7. Personnel at Increased Elevation

a. Members permanently assigned or on TAD to locations at increased elevation shall participate in Physical Readiness Program, including PFAs. Increased elevation is defined as greater than or equal to 5,000 feet above mean sea level.

b. For PRT conducted at increased elevation, support facilities and personnel required by this instruction must be available.

c. PRT shall be conducted at nearest suitable site with lower or equal elevation.

d. PRT conducted at increased elevation shall be scored using standards for increased elevation. These standards are adjusted for effects of altitude.

e. Elevation adjustment in standards reflects research based on an acclimation period of 30 days. Commands shall provide members an acclimation period of at least 30 days prior to conducting PRT.

f. Other than PRT scoring, PRT procedures are not modified due to increased elevation.

10 October 2002

g. Commands shall institute all appropriate safety measures to minimize risk of injury to members exercising at increased elevation.

8. Interpretation of Performance Standard Tables

a. Values for curl-ups and push-ups are minimum required to attain category.

b. Run time values are maximum allowed to attain category.

c. If members attempt and fail a cardiorespiratory event, it is considered a PRT failure; an attempt on a different cardiorespiratory event is not authorized. For example, members failing run on treadmill, track, or outdoor course cannot participate in swimming test.

d. Inability to touch toes and hold for 1 second does not constitute a PRT failure.

9. Grading PRT

a. PRT is passed when members achieve "Probationary" performance standard or better for

(1) curl-ups, push-ups, and one cardiorespiratory event (run/walk or swim), or

(2) any two PRT events (other than sit reach) when the third is medically waived.

b. Regardless of level of performance on other events, PRT is failed when members do not achieve "Probationary" performance standard or better for any PRT event (other than sit reach) unless event is medically waived.

10. Overall Score

a. Overall score is performance category-level corresponding to the average of points accumulated on PRT events. Members must pass all three PRT events to receive an overall score.

b. Members must perform push-ups, curl-ups, and a cardiovascular event. Members who are medically waived from any of these events cannot be assigned an overall score.

c. Point assignment

Category Level	Points
Outstanding-High	100
Outstanding-Medium	95
Outstanding-Low	90
Excellent-High	85
Excellent-Medium	80
Excellent-Low	75
Good-High	70
Good-Medium	65
Good-Low	60
Satisfactory-High	55
Satisfactory-Medium	50
Probationary	45

d. Example for 25 year-old female.

Step 1. Determine points for each event.

Event	Performance	Performance Category-Level	Points
Curl-ups	91	Excellent High	85
Push-ups	26	Good Medium	65
Run	15:23	Satisfactory High	55

Step 2. Add points for individual events.

$$85 + 65 + 55 = 205 \text{ points.}$$

Step 3. Divide total points by three.

$$205 \text{ divided by } 3 = 68.3.$$

Step 4. Assign performance category-level.

(Category-level is not achieved unless average equals or exceeds points corresponding to category-level.) 68 points equals "Good Medium".

10 October 2002

## **ADMINISTRATIVE ACTIONS**

### **1. PFA**

a. A PFA is a semi-annual event comprised of BCAs (maximum weight for height screening and body fat percentage measurements) and PRTs (sit-reach, curl-ups, push-ups, and run/walk or swim). PFAs are required of active duty and reserve members, the results of which must apply towards administrative consequences of this instruction. Commanding officers may require additional PFAs/BCAs to monitor individual progression, but only the official semi-annual PFA will apply towards administrative consequences.

b. Failure to meet BCA or PRT standards prior to 1 May 2000 shall not count towards administrative consequences set forth in this instruction.

c. Members shall not participate in more than two official PFAs in a calendar year.

d. Only the first BCA and PRT of each official PFA meeting testing requirements of this instruction shall comprise member's PFA, if members participate in more than one BCA or PRT.

e. PFAs shall be completed at least 4 but not to exceed 8 months from preceding PRT.

f. BCA shall normally be taken within 10 days of, but absolutely not less than 24 hours, prior to participation in PRT. Refer to reference (b) for Drilling Reservists.

g. Members shall be provided written notification at least 10 weeks in advance of dates for conducting PFA components. Personnel who have not been given 10 weeks notice shall not participate in PRT. Written notification shall specify time periods during which PFA components shall be conducted. Components conducted outside these periods shall not comprise the same PFA.

h. Only BCA taken by CFLs (or designated and trained assistant CFLs) shall apply toward Physical Readiness Program administrative actions.

10 October 2002

- i. Failure of BCA as part of a PFA is a PFA failure.
- j. Failure of PRT as part of a PFA is a PFA failure.
- k. Failing both BCA and PRT of the same PFA shall be counted as one PFA failure.
- l. Members shall not be deemed to acquire a PFA failure or pass when medical waiver is granted for BCA and all PRT events during a PFA.
- m. If members fail to achieve "Probationary" standard or better for any PRT event, participation in another PRT to apply to the same PFA is not permitted.
- n. Reassessment of body composition is not permitted
  - (1) if member fails to meet BCA standards during PFA; or
  - (2) if corresponding PRT is cancelled or rescheduled.

## 2. Injury or Illness During PRT

a. If injury or illness during PRT impairs normal performance and the COs determines the illness or injury was not due to the member's failure to participate in an effective conditioning program, medical waiver for the event in which the injury occurred and subsequent event(s) is authorized. PFA shall then be comprised of either

(1) Results of PRT in which the member was injured or ill provided the PRT is graded per this instruction, or

(2) A subsequent PRT conducted and graded per this instruction.

b. If injury or illness during PRT impairs normal performance and the COs determines the illness or injury was due to member's failure to participate in an effective conditioning program, the cos:

(1) Shall not authorize a medical waiver for the event in which the injury occurred and subsequent events.

10 October 2002

(2) shall use results to constitute member's PFA. PRT shall be graded per this instruction. (Members shall not be allowed to participate in a subsequent PRT.)

c. When members are injured or become ill during PRT or physical training, CFLs shall report to command safety officer. Command safety officer shall report injury or illness to COMNAVSAFECEN using guidance contained in chapter 14 of reference (j). Include as information addressees BUMED (MED-02), NAVPERSCOM (PERS-651), and NHRC.

### 3. Tracking PFA Failures

a. Member's command is responsible for tracking PFA results and taking appropriate administrative action.

b. Members shall be notified in writing following each PFA failure.

(1) Written counseling shall detail substandard performance requiring correction, action required of members, and administrative consequences for failure to correct performance. If deemed appropriate by COs additional actions may be included.

#### (2) Enlisted Members

(a) Written counseling shall include at least one NAVPERS 1070/613, Administrative Remarks (appendix A of this enclosure).

(b) Signed original NAVPERS 1070/613 shall be forwarded to NAVPERSCOM (PERS-31) for inclusion in permanent personnel record and copy shall be placed in member's field service record.

#### (3) Officers

(a) When members acquire first or second failure in most recent four-year period, COs are not required to make an adverse entry in permanent service record. Written notification similar to appendix B of this enclosure is sufficient to meet the requirement of written counseling. There is no requirement to forward this notification to NAVPERSCOM.

(b) Appendix C of this enclosure is sufficient, to meet the requirement of written counseling required, when

1. it is first or second failure in most recent four-year period and the COs thinks an adverse entry in the permanent service record is warranted, or

2. there is cause to believe that the officer is physically unqualified for promotion as a result of PFA failure or,

3. it is third or greater failure in 4 years.

original counseling shall be forwarded to NAVPERSCOM (PERS-834) with a copy of NAVPERS 1610/2 or NAVPERS 1611/2.

c. Documentation of written counseling provided anytime prior to members acquiring third PFA failure in a 4-year period is sufficient notice for all administrative actions specified in this instruction.

4. PCS Transfer. Members who fail to meet BCA or PRT standards including those with 3 or more PFA failures in most recent 4-year period, may transfer on Permanent Change of Station (PCS) orders. Members must meet all requirements including obligated service. PCS transfer to some designated duties may be restricted to members who are within standards at time of transfer or on most recent PFA. Contact community detailers and receiving command for guidance.

a. Individuals not in standards and currently under Sea Duty orders shall contact the MDR performing the screening so that the Sailor's next command can be notified of Body Composition percent.

b. If individuals report at next command significantly out of Body Composition percent, are found unable to perform duties on platform, or MDR finds Sailor is not compatible for platform, refer to reference (k), article 15-30.

5. Schools and Select Communities

10 October 2002

a. Certain communities may require members to remain within BCA or PRT standards to retain standing in that community. Contact community detailers or school command for guidance.

b. Select schools may require members to report within BCA or PRT standards in order to be accepted for training, or require members to be within standards to graduate. Contact community detailers or school command for guidance.

6. Promotion, Advancement, Frocking, and Redesignation  
(Figure 8-1)

a. Authority to recommend, deny, or execute advancement, promotion, frocking, or redesignation per references (g), articles 1420-020 and 1420-060, (l), (m), and (n), shall remain discretion of COs or appropriate authority except for situations covered in paragraphs b and c below. Nothing in this instruction shall be construed as requiring advancement, promotion, frocking, or redesignation of members, officer or enlisted, where COs do not consider members physically or otherwise qualified for advancement, promotion, frocking or redesignation.

b. Officers. Officers who fail three or more PFAs in most recent 4-year period and are not meeting fitness progression shall not be promoted, frocked, or redesignated until members

(1) subsequently passes three consecutive PFAs, or

(2) no longer possesses three PFA failures in most recent 4-year period.

c. Enlisted Members

(1) Members who fail three or more PFAs in most recent 4-year period and are not meeting fitness progression

(a) Shall not be frocked or advanced until member

1. Subsequently passes three consecutive PFAs and are within standards on day of action, or

2. No longer possesses three PFA failures in most recent four-year period.

(b) Are ineligible to compete for advancement (take advancement examination) until passing two consecutive PFAs. Members may not be advanced or frocked until passing three consecutive PFAs.

(2) Members who have failed less than three PFAs in most recent four-year period may be frocked and advanced.

d. Waiver requests will not be considered.

7. PFA Codes. Codes for use in NAVPERS 1610/2, NAVPERS 1611/2, and NAVPERS 1616/26 shall use three letters with a slash (/) between first and second letter. In all cases, the single letter to left of slash shall only indicate performance on most recent PRT (exercise portion of PFA) occurring during the reporting period. Two letters to right of slash shall only indicate most recent BCA of PFA.

a. PRT results. Only letters P (Pass), F (Fail), M (Medically Waived), and N (Not Tested) shall be used.

(1) "P" shall be used when members achieve "Probationary" standard or better on two or PRT events (excluding or two sit-reach) events with an authorized medical waiver for the third.

(2) "F" shall be used when members participate in all or part of PRT and fail to achieve "Probationary" standard or better on any event (excluding sit-reach).

(3) "M" shall be used when members are granted medical waiver from two or more PRT events (excluding sit-reach) and achieve "Probationary" standard or better on all non-medically waived events. Pregnancy is a medical condition.

(4) "N" shall be used when members do not participate in one or more non-medically waived PRT events. When "N" is used, justification must be provided in "Comments on Performance" block of NAVPERS 1610/2, NAVPERS 1611/2 or NAVPERS 1616/26.

b. BCA. Only combinations WS (Within Standards), NS (Not Within Standards), MW (Medically Waived from Measurement), and XX (Not Weighed or Measured) shall be used.

(1) "WS" shall be used when members are determined to be "within" BCA standards.

(2) "NS" shall be used when members are determined to be "not within" BCA standards.

(3) "MW" shall be used for pregnancy or unusual cases where member's weight or circumference stat distorted by a temporary medical condition.

(4) "XX" shall be used for rare cases where it is not possible to weigh or measure member. Justification must be provided in "Comments on Performance" block of NAVPERS 1610/2, NAVPERS 1611/2 or NAVPERS 1616/26.

8. NAVPERS 1610/2, NAVPERS 1611/2 and NAVPERS 1616/26

a. Authority to assign marks regarding promotability, retention, and other NAVPERS 1610/2, NAVPERS 1611/2 or NAVPERS 1616/26 items of members per reference (d), shall remain the discretion of COs except for situations covered in paragraphs below.

b. Annotate NAVPERS 1610/2, NAVPERS 1611/2, and NAVPERS 1616/26 thus:

(1) Results from most recent PFA performed during reporting period shall be recorded in Block 20 using appropriate PFA codes. Results for Flag Officers shall be recorded in block 15a of NAVPERS 1611/2, Report on the Fitness of Flag Officers and Flag Selectees.

(2) Results of all PFAs (except most recent) performed during reporting period shall be documented in "Comments on Performance" section using appropriate PFA codes. Results may be documented in the following manner:

(a) Apr 0X PFA: M/MW.

(b) Oct 0X PFA: M/XX. Unauthorized absence.

c. Performance trait grades and recommendations shall conform to the following:

10 October 2002

(1) No minimum mark for "Military Bearing" or for promotability and retention is mandated or prohibited for:

(a) reporting period in which member's first or second PFA failure in a 4-year period occurs, and

(b) reporting period in which member's third PFA failure in a 4-year period occurs if members are meeting prescribed fitness progression.

(2) For reporting period in which members fail third or more PFA in most recent 4-year period and are not meeting prescribed fitness progression,

(a) Enlisted members shall receive

1. A grade of 1.0 in "Military Bearing".

2. Marks of "Significant Problems" and "Retention Not Recommended", respectively.

(b) Officers shall receive

1. A grade of 1.0 in "Military Bearing".

2. mark for promotability shall be "Significant Problems".

d. Reporting seniors shall use their discretion when determining "Military Bearing" and retention recommendation marks for a reporting period in which a member passes all PFAs. Overall scores of "Outstanding" or "Excellent" are not required for assigning 5.0 in "Military Bearing".

#### 9. Reenlistment and Extension

a. Enlisted members who fail to meet PFA standards three or more times in most recent four-year period are ineligible for reenlistment until they pass three consecutive PFAs.

b. Reenlistment of members with 18 or more years of service or otherwise within two years of qualifying for retirement is subject to 10 U.S.C., sections 1176 and 12686. Achieving 18 or

more years of service does not provide sanctuary from separation due to PFA failures. It only requires that separation authority come from CHNAVPERS or higher.

c. Upon request and with CO's approval members may be extended in six-month increments per reference (c), article 1160-040, to allow them to pass three consecutive PFAs and become eligible for reenlistment per reference (c), article 1160-030. Copy of extension request, or offer and denial or acceptance shall be forwarded to NAVPERSCOM (PERS-4). The limit of extensions to an aggregate of 48 months in any single enlistment remains in effect.

d. Failure of PFA during extension period for above reason shall prevent additional extension and result in discharge at end of Expiration Active Obligated Service (EAOS).

e. Waiver requests will not be considered.

10. TAD. PFA shall be conducted per this instruction.

11. Conducting PFAs at Service Schools of Less Than 10-Weeks Duration

a. If PFA is to be conducted, PFA shall be conducted per this instruction.

b. When meeting minimum fitness standards is a graduation requirement, schools may conduct PRT under the following circumstances:

(1) Members have a current PHA.

(2) Members have current periodic physical examination.

(3) Schools have a moderately paced fitness training program in which student has developed (or maintained) and demonstrated a level of fitness during school that allows safe participation in PRT.

b. Ensure PFA results are forwarded to member's next command to avoid members participating in more than two PFAs per calendar year.

12. Conducting PFA at Schools of More Than 10-Weeks Duration

- a. PFA shall be conducted per this instruction.
- b. Ensure results are forwarded to member's next command to avoid members participating in more than two PFAs per calendar year.

13. Duty Under Instruction (DUINS). Members who are in a DUINS status are subject to provisions of this instruction. PFA is to be conducted by member's reporting unit.

14. Isolated Duty Stations

a. Members serving at isolated duty stations shall comply with requirements of this instruction, as determined by the CO or

b. PRT may be suspended or Commander's, CO's, and or OIC's discretion. BCA shall be performed.

15. Service at Multi-Service Commands, With Another Service, or at Unified Joint Commands

a. Members shall comply with provisions of this instruction.

b. Members serving with U.S. Marine Corps (USMC)

(1) Must participate in BCA per this instruction.

(2) Who choose to take and pass USMC Physical Fitness Test (PFT), has met requirements of PRT.

(3) Who choose to take and fail USMC PFT, shall be tested on PRT when sufficient conditioning has occurred.

(4) Who fail USMC PFT shall not be subject to administrative action under this instruction for that failure.

16. Newly Reported Personnel. Members who report to a command other than service school command, less than 10 weeks prior to scheduled date or dates of PFA

10 October 2002

- a. Cannot be required to participate in PRT.
  - b. May voluntarily participate in PRT if within BCA standards, have a current periodic physical examination, and have a current PHA. Commands shall document voluntary consent to participate.
  - c. Can be required to participate in BCA.
17. Selected Reserve (SELRES)
- a. SELRES members shall comply with provisions of this instruction.
  - b. PFA shall be responsibility of Naval Reserve activity Commanders, COs, and OICs as directed by reference (b).
18. Limited Duty (LIMDU)
- a. Members on LIMDU shall receive guidance from medical department concerning type(s) and duration(s) of activities appropriate to maintain physical conditioning and appropriate body composition, given the nature of illness or injury.
  - b. Members on LIMDU who are not medically waived from participation in PFA and do not meet standards are subject to appropriate administrative action.
  - c. Members who are ineligible for frocking, advancement, reenlistment, or incur other administrative consequences due to PFA failures prior to being assigned to limited duty remain ineligible during LIMDU period.
  - d. Members who are removed from LIMDU status less than 10 weeks prior to a scheduled PFA shall participate in all portions of PFA for which medically cleared.
19. Physical Evaluation Board (PEB)
- a. Inability to meet Physical Readiness Program standards or lack of participation in PFA does not justify referral to PEB.

10 October 2002

b. Inability to participate in or pass PFA shall not be the sole basis for a finding of "Unfit" to continue naval service by PEB.

c. A "Fit" finding by PEB does not mean members are automatically able or ready to participate in PFA. This also does not preclude members being determined unsuitable due to inability to participate in PFA.

20. Obligated Service

a. Nothing in this instruction requires separation of members during a period of obligated service when CHNAVPERs determines that retention is in best interest of Navy.

b. Members shall not be processed for administrative separation solely for failure to meet Physical Readiness Program standards.

21. Participation in ShipShape

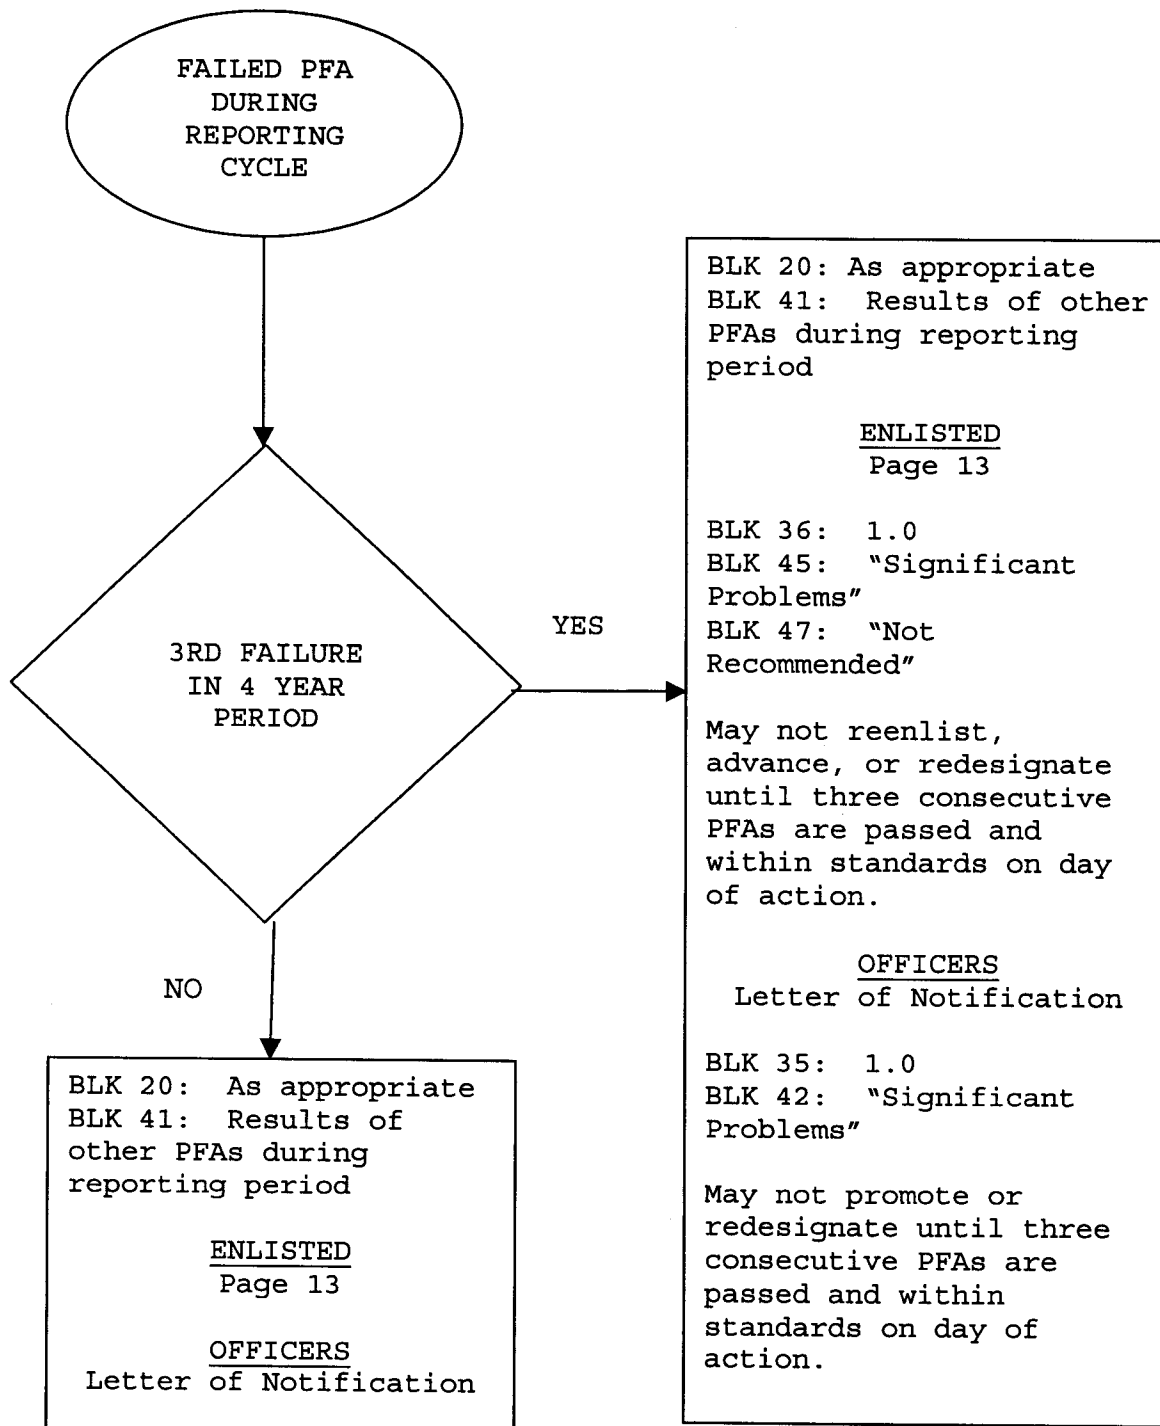

a. NAVPERS 1070/613, Administrative Remarks entry shall be made in the service record documenting completion of participation, refusal to participate when offered, or premature termination of members who are required by their command to attend for failure to meet Physical Readiness Program standards.

b. CFLs shall enter results of FEP-required BCA and PRTs in PRIMs.

22. Procedural Rights. Failure to adhere to provisions of this instruction by those responsible command officials tasked with its implementation creates no substantive or procedural rights among those individuals who fail to comply with the standards of the Physical Readiness Program.

10 October 2002

**Figure 8-1. Physical Fitness Assessment Failure  
Consequence Decision Process.**

10 October 2002

**ADMINISTRATIVE COUNSELING/WARNING****(Place on NAVPERS 1070/613, Administrative Remarks Page)**

1. You are being retained in the naval service; however, the following deficiencies in your performance and or conduct are identified:

- a. ☐ Failure to meet body composition assessment standards.

Date of body composition assessment: \_\_\_\_\_.

Weight (lbs): \_\_\_\_\_ Height (in): \_\_\_\_\_ Neck (in): \_\_\_\_\_  
Abdomen (in): \_\_\_\_\_ Waist (in): \_\_\_\_\_ Hips (in): \_\_\_\_\_

Body fat (%): \_\_\_\_\_

Run (min:sec): \_\_\_\_\_ Swim (min:sec): \_\_\_\_\_

Event(s) failed: ☐ push-ups ☐ curl-up ☐ run ☐ swim

- c. In the most recent 4 years this is your ☐1<sup>st</sup> ☐2<sup>nd</sup> ☐3<sup>rd</sup>  
☐ greater failure to meet standards.

2. The following corrective actions are required as of this date:

a. Actively participate in a Fitness Enhancement Program (FEP) directed and monitored by your command. You shall participate until your body fat percentage is below the upper allowable Navy limit and you achieve "Good-Low" or better on all unwaivered PRT events in two consecutive PFAs.

b. Physically train at a minimum of three sessions each week. Each session shall include at least 20-40 minutes of aerobic exercise, muscular strength and endurance activities, and flexibility exercises.

c. Read and complete NAVPERS 15602A, Navy Nutrition and Weight Control Self-Study Guide.

- d. Establish a healthy diet.
3. Assistance is available through your chain of command, medical department personnel, and Morale, Welfare, and Recreation Fitness professionals. Your Command Fitness Leader, \_\_\_\_\_, can assist you in obtaining guidance from each.
4. You are aware of the administrative actions for failure of a first or second PFA in the most recent 4-year period. These include, but are not limited to
- a. documentation of your PFA result(s) on your enlisted evaluation for the reporting period in which the failure(s) occurred.
  - b. ineligibility to transfer to any special duty or school if you do not meet physical readiness standards for that duty or school.
  - c. other actions as deemed appropriate by your chain of command.
5. You are aware of the administrative actions for failure of a third PFA in the most recent 4-year period. These include, but are not limited to, those above and
- a. mark of 1.0 in "Military Bearing" for the reporting period in which the failure occurred.
  - b. marks for promotability and retention shall be "Significant Problems" and "Retention Not Recommended", respectively.
  - c. ineligibility for frocking, advancement, or reenlistment until you pass all PRTs and are within standards for all body composition assessments for three consecutive PFAs.
  - d. may only be granted an enlistment extension at CO's discretion to participate in next immediate PFA. Failure of a PFA before three consecutive passes shall result in discharge at end of active obligated service.

10 October 2002

6. This counseling/warning entry is made to afford you an opportunity to undertake the recommended corrective actions. As stated above, your failure to meet Physical Readiness Program standards may result in adverse administrative actions.

7. This counseling/warning entry is based upon known failures in your compliance with the Physical Readiness Program. Any unknown failure(s) or unrelated deficiencies in performance or conduct will invalidate this counseling/warning entry and result in judicial or non-judicial actions.

8. No additional written notification need be issued to execute the administrative actions specified in this document.

\_\_\_\_\_  
Commanding Officer

☐ I acknowledge the above counseling/warning and understand its contents.

☐ I have been informed of my right to submit a statement in response to this counseling/warning (initial one below).

\_\_\_\_\_ I intend to submit a statement. I will submit my statement within 10 days of this date.

\_\_\_\_\_ I do not intend to submit a statement.

**COMMAND FITNESS LEADER (CFL) QUALIFICATIONS**

1. CFL Qualifications. Setting the course toward a Navy fitness culture requires leadership from the front. CFL qualifications shall be as follows:

- a. E-6 or above preferred.
- b. CPR qualified.
- c. Non-user of tobacco products.
- d. Overall PRT score of "Excellent-Low" or better.
- e. Be within maximum weight for height standards or no more than 21 percent body fat for males or 32 percent for females.
- f. Complete NAVPERSCOM-approved CFL certification course.

2. CFL Training. CFL training is an intensive and challenging overview providing the practical skills necessary to conduct an effective program afloat and ashore. Personnel successfully completing training receive certification as both a Physical Fitness Specialist certified by the Cooper Institute and CFL. CFL training consists of classroom and practical hands-on sessions over 5 days and covers

- a. basic exercise science (physiology, nutrition and weight control, psychology of motivation, program adherence, and stress management).

- b. Physical Readiness Program administration (PFA procedures, record management, and use of CFL software, safety, etc.).

- c. exercise programming and organization (coordinating individual and command needs, physical training session scheduling, promotion of exercise, space and equipment utilization).

- d. coordination of resources available to CFL (MWR, medical department, NAVPERSCOM, support commands, etc.).

10 October 2002

3. Until command secures a fully qualified CFL

a. appoint an interim CFL. In appointment letter identify deficiencies, state date to complete qualification, and identify resources and personnel (CFL at another command, MWR fitness professional, former qualified CFL, and other appropriate personnel) who will assist interim CFL in the safe conduct of the Physical Readiness Program.

b. establish a Memorandum of Understanding (MOU) with all activities providing resources and personnel. MOU shall identify all responsibilities and authorities of persons involved in the Physical Readiness Program at the command.

c. command shall secure fully qualified CFL within 6 months of appointment of interim CFL.

10 - 15 WEEKS BEFORE**

<b>COMMAND</b>	_____	<b>CFL</b>	_____
<b>PRT DATES</b>	_____	<b>MONITORS</b>	_____
<b>MAKE-UPS</b>	_____	<b>MONITORS</b>	_____

**COMMAND FITNESS LEADER**

**DATE  
COMPLETED**

Review written summary from the previous PFA \_\_\_\_\_

- ☐ Develop acceptable dates to conduct PFA components (HT,/WT, Body Fat, PRT) \_\_\_\_\_
- ☐ Review and understand all current specifics pertaining to the PRT including test sequence, length of test, and rest between each event \_\_\_\_\_
- ☐ Obtain COMNAVPERSCOM-approved PRIMS application \_\_\_\_\_
- ☐ Conduct preliminary (courtesy) body composition assessments \_\_\_\_\_
- ☐ Announce dates for conducting the PFA at least 10-15 weeks in advance \_\_\_\_\_

**COMMAND FITNESS LEADER**

**DATE  
COMPLETED**

- ☐ Verify each member's PHA was completed within last year. If not, refer to medical department. Send with member completed PARFQ (PRIMS) \_\_\_\_\_
- ☐ Conduct preliminary (courtesy) Body Composition Assessment (BCA). If member fails, and no prior medical evaluation exists, member refer to the medical department \_\_\_\_\_
- ☐ Verify that members' periodic physical examinations are current. (If not, refer to Medical Department) \_\_\_\_\_
- ☐ Establish Command policy regarding members' conflicts (drills, TAD, leave, vacation, deployment) \_\_\_\_\_
- ☐ Develop plan for medical attention during PRT \_\_\_\_\_
- ☐ Estimate number of members who will be completing the PRT \_\_\_\_\_
- ☐ Other: \_\_\_\_\_

**SCHEDULING**

**DATE  
COMPLETED**

- ☐ Evaluate schedule limitations for PFA \_\_\_\_\_
- ☐ Determine time (hours, day, etc.) limitations; check base schedule \_\_\_\_\_
- ☐ Determine personnel requirements \_\_\_\_\_
- ☐ Identify facility limitations \_\_\_\_\_

**SCHEDULING**

**DATE  
COMPLETED**

- ☐ Evaluate, if any, weather liability concerns \_\_\_\_\_
- ☐ Establish make-up dates for poor weather conditions \_\_\_\_\_
- ☐ Determine and announce alternate dates for members who cannot participate in PFA due to TAD, leave, holidays, etc. \_\_\_\_\_
- ☐ Other: \_\_\_\_\_

**EQUIPMENT/SUPPLIES**

**DATE  
COMPLETED**

- ☐ Review last PFA list of what was rented, borrowed, and purchased... from where and how much \_\_\_\_\_
- ☐ Review previous PFA equipment needs \_\_\_\_\_
- ☐ Plan for replacement of lost and damaged equipment \_\_\_\_\_
- ☐ Review and/or develop equipment check in and out system \_\_\_\_\_
- ☐ Secure CFL and monitor shirts (if available) \_\_\_\_\_

**FACILITIES**

**DATE  
COMPLETED**

- ☐ Reserve adequate fitness facilities (include pool if available) \_\_\_\_\_
- ☐ Obtain written fitness facility reservation well in advance \_\_\_\_\_

\_\_\_\_\_

**NAVY PHYSICAL FITNESS ASSESSMENT  
CHECKLIST**

**ORGANIZING THE EVENT  
2 DAYS - 8 WEEKS BEFORE**

**COMMAND FITNESS LEADER**

**DATE  
COMPLETED**

- ☐ Develop an appropriate format for the completion of the test
- ☐ Organize and recruit qualified personnel to assist in PFA
- ☐ Develop administrative procedures for members who incorrectly perform test, incur muscle cramps during test, or stop to rest
- ☐ Other:

---

---

---

---

**MEMBERS**

**DATE  
COMPLETED**

- ☐ Re-check and confirm that each member's periodic physical examinations are current
- ☐ Provide the Navy Weight Control Self-study Guide to any member who fails to meet body composition standards
- ☐ Confirm that members who checked Yes to any questions on the Physical Activity Risk Factor Questionnaire (PARFQ) have been seen by medical staff or have a confirmed appointment prior to the PFA date
- ☐ Other:

---

---

---

---

**SCHEDULING**

**DATE  
COMPLETED**

- ☐ Develop a master schedule form for the PRT
- ☐ Duplicate policy instructions for each test that should be read by the CFL or monitor(s)
- ☐ Other:

**EQUIPMENT/SUPPLIES**

**DATE  
COMPLETED**

- ☐ Obtain all equipment and supplies needed for event:
  - \_\_\_\_\_ chairs
  - \_\_\_\_\_ water/cooler
  - \_\_\_\_\_ tables
  - \_\_\_\_\_ paper cups
  - \_\_\_\_\_ clipboards
  - \_\_\_\_\_ First Aid kit
  - \_\_\_\_\_ floor mats
  - \_\_\_\_\_ AED (if equipment and trained operators are available)
  - \_\_\_\_\_ scorecards
  - \_\_\_\_\_ stopwatches (measures both minutes and seconds)
  - \_\_\_\_\_ pencils/pens
  - \_\_\_\_\_ measuring wheel (1.5 mile run)
  - \_\_\_\_\_ runner numbers
- ☐ Acquire back-up equipment system in case of original equipment failure
- ☐ Conduct preliminary tests of all equipment
- ☐ Arrange transport of large equipment items
- ☐ Submit forms for equipment rental
- ☐ Other:

**FACILITIES**

**DATE  
COMPLETED**

- ☐ Reserve room for member meeting \_\_\_\_\_
- ☐ Confirm facility reservations and arrangements \_\_\_\_\_
- ☐ Identify location of test stations \_\_\_\_\_

**PERSONNEL**

**DATE  
COMPLETED**

- ☐ Contingency plan for CFL, monitors, and lifeguards, etc. \_\_\_\_\_
- ☐ Prepare final list of volunteers and paid employees needed for the event \_\_\_\_\_
- ☐ Distribute and explain personnel job descriptions and plan a personnel training session for select positions \_\_\_\_\_
- ☐ Arrange for medical staff location and supplies when available \_\_\_\_\_

**RISK MANAGEMENT**

**DATE  
COMPLETED**

- ☐ Train staff on proper procedures for identifying and handling weather and environmental conditions \_\_\_\_\_
- ☐ Confirm plan for inclement weather \_\_\_\_\_
- ☐ Call local base branch medical or hospital and let personnel know that you are conducting a PRT and where it will be held \_\_\_\_\_
- ☐ Review plan for obtaining immediate medical assistance if needed \_\_\_\_\_

OPNAVINST 6110.1G  
10 October 2002

- ☐ Obtain appropriate First Aid Kit with supplies and equipment (**only** if Command supported and they have First-Aid Certified Personnel)
-

**NAVY PHYSICAL FITNESS ASSESSMENT  
CHECKLIST**

**CONDUCTING THE EVENT  
1 - DAY BEFORE**

**COMMAND FITNESS LEADER**

**DATE  
COMPLETED**

- ☐ Consult with Commander, CO, or OIC regarding last minute cancellation procedures if unsafe weather conditions are present
- ☐ Review safety plan and other procedures with assistant CFLs
- ☐ Confirm site, equipment, and safety procedures are in place
- ☐ Confirm that all certified monitors will be present at PRT site
- ☐ Other:

---

---
